

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 20-F/A

REGISTRATION STATEMENT PURSUANT TO SECTION 12(b) OR (g) OF THE SECURITIES EXCHANGE ACT OF 1934

OR

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2021

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

OR

SHELL COMPANY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Date of event requiring this shell company report _____

For the transition period from _____ to _____

Commission File Number: 333-182072

PATAGONIA GOLD CORP.

(Exact name of Registrant as specified in its charter)

British Columbia, Canada

(Jurisdiction of incorporation or organization)

Av. Libertador 498 P.26 Argentina C.A.B.A

(Address of principal executive offices)

2200 HSBC Building, 885 West Georgia Street

Vancouver, British Columbia

V6C 3E8

(+5411) 52786950

(Name, telephone, e-mail and/or facsimile number and address of company contact person)

Securities registered or to be registered pursuant to section 12(b) of the Act: **None**

Securities registered or to be registered pursuant to Section 12(g) of the Act: **None**

(Title of Class)

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act: **None**

(Title of Class)

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report. **466,566,441 common shares.**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes

No

If this report is an annual or a transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted and pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of “accelerated filer and large accelerated filer” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer <input type="checkbox"/>	Accelerated filer <input type="checkbox"/>	Non-accelerated filer <input checked="" type="checkbox"/>
		Emerging growth company <input type="checkbox"/>

If an emerging growth company that prepares its financial statements in accordance with U.S. GAAP, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards† provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant has filed a report on and attestation to its management’s assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. Yes No

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP <input type="checkbox"/>	International Financial Reporting Standards as issued by the International Accounting Standards Board <input checked="" type="checkbox"/>	Other <input type="checkbox"/>
------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------

If “Other” has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow: Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Auditor Name	Location	Firm ID
Grant Thornton LLP	Vancouver, Canada	1390

EXPLANATORY NOTE

This Amendment No. 1 on Form 20-F/A (the “Amendment”) amends the following sections – Glossary of Mining Terms, Items 3D, 4, 5A, 5B, 6A, and 7B under Part I, and Item 19 under Part II – of the Annual Report on Form 20-F for the year ended December 31, 2021, which was originally filed with the Securities and Exchange Commission on May 2, 2022 (the “Original Annual Report”). The Cautionary Note Regarding Estimates of Mineral Resources has been deleted in its entirety. We are filing this amendment solely to remove mineral resource disclosure for the Cap-Oeste and Calcatreu properties and to amend certain corresponding sections listed above as the Company has not prepared technical report summaries for these properties as required under Subpart 1300 of Regulation S-K.

Except as described above, we have not modified or updated any disclosures presented in the Original Annual Report. This Amendment does not reflect events occurring after the filing of the Original Annual Report or modify or update those disclosures, including the exhibits (except those referenced above) to the Original Annual Report. Accordingly, this Amendment should be read in conjunction with our filings with the Securities and Exchange Commission (the “SEC”) subsequent to the filing of the Original Annual Report.

GENERAL

In this Annual Report on Form 20-F (the “Annual Report”), references to “we”, “us”, “our”, the “Company”, and “Patagonia” means Patagonia Gold Corp., and its subsidiaries, unless the context requires otherwise. All currency amounts in this Annual Report are stated in United States Dollars unless otherwise indicated. The financial statements and summaries of financial information have been prepared in accordance with International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board (the “IASB”).

NOTE REGARDING REVERSE TAKE-OVER TRANSACTION

On July 24, 2019, Patagonia Gold Corp. (formerly Hunt Mining Corp (“Hunt”)) and Patagonia Gold Limited (“PGL”) (formerly Patagonia Gold PLC (“PGP”)) completed a reverse acquisition (the “RTO”) resulting in the Company acquiring all of the issued common stock of PGL in exchange for common shares of the Company on the basis of 10.76 common shares for each PGL share then outstanding. The Company issued 254,355,192 common shares to the shareholders of PGL representing an ownership interest of approximately 80%. The operating name of Hunt Mining Corp. was changed to Patagonia Gold Corp after the RTO.

As a result of the RTO, former shareholders of PGL acquired control of the Company, and the transaction was accounted for as an RTO that constitutes a business combination for accounting purposes. PGL is deemed to be the acquiring company under IFRS and its assets and liabilities, equity and historical operating results are included at their historical carrying values, and the net assets of the Company are recorded at the fair value as at the date of the transaction.

All comparative financial information disclosed in this Annual Report prior to the date of the RTO is that of PGL.

NOTE REGARDING FOREIGN PRIVATE ISSUER STATUS

Patagonia Gold Corp. was incorporated under the *Business Corporations Act* (Alberta) and currently exists under and is governed by the *Business Corporations Act* (British Columbia). Our business is administered principally outside of the United States and the majority of our assets are located outside of the United States. Pursuant to the RTO, shareholders of PGL received 254,355,192 common shares of the Company (representing an ownership interest of approximately 80%). As a result, as of December 31, 2021, 77.89% of the Company’s common stock was held by non-United States citizens and residents.

NOTE REGARDING THE PREPARATION OF THE COMPANY'S FINANCIAL STATEMENTS

Prior to the RTO, the Company did not qualify as a foreign private issuer and was therefore required to file its financial statements with the U.S. Securities and Exchange Commission (the "SEC") in accordance with United States generally accepted accounting principles ("U.S. GAAP"). As a result of the RTO and the Company qualifying as a foreign private issuer, the Company prepared its financial statements for the year ended December 31, 2021 and 2020 in accordance with IFRS, as issued by the IASB. The Company's financial statements included in this Annual Report for the years ended December 31, 2019 were previously prepared in accordance with U.S. GAAP and converted for the purposes of this Annual Report in order to comply with IFRS, as issued by the IASB.

GLOSSARY OF MINING TERMS

The following explanations are not intended as technical definitions, but rather are intended to assist the reader in understanding some of the terms used in this annual report.

"Adularia" - A low temperature variety of potassium feldspar as an accessory mineral in low sulfidations mineral deposits.

"Andesite" - A dark-colored, fine-grained, mostly extrusive (volcanic) rock, that is the fine-grained equivalent of diorite, and composed of plagioclase feldspar and one or more mafic minerals (e.g., biotite, hornblende, pyroxene, usually <20%).

"Argillic" - Pertaining to clay or clay minerals (i.e., argillic alteration in which certain minerals of a rock are converted to minerals of the clay group).

"Breccia / brecciated" - A coarse-grained clastic rock, composed of angular broken rock fragments held together by a mineral cement or in a fine-grained matrix. Breccia may form from explosive igneous activity, collapse of rock material, faulting or other processes.

"Chalcedonic" - A general term for all varieties of quartz that are made of microscopic or submicroscopic crystals.

"Chargeability and resistivity" - The response of geologic body to the flow of an electrical current: i.e., conduct or retain (chargeable) or resist (resistivity), often used in geophysical mineral exploration.

"Cockade / cockade texture" - Fault or cavity fillings in which the fragments are surrounded by concentric layers of cementing minerals (e.g. quartz) common in low-temperature, hydrothermal mineral deposits.

"Colloform" - Said of the rounded, finely-banded mineral texture formed by ultra-fine-grained rhythmic precipitation of minerals like quartz.

"Cutoff grade / cut-off grade" - The minimum grade required for a mineral commodity to be economically mined (or processed).

"Depletion" - The decrease in quantity of ore in a deposit or property resulting from extraction or production.

“Development” - Activities involved in preparing a mine for ore extraction and a planned production level, including tunneling, shaft sinking, crosscutting, drifting and raising, and those costs incurred to enable the conversion of mineralization to reserves.

“Dilution” - The mixing of waste rock with ore, resulting in a decrease in the overall grade.

“Diamond drilling / core drilling” - A form of rotary drilling which uses a diamond-impregnated drill bit attached to the end of the drill pipe to extract a cylindrical section of rock from the subsurface.

“Dilational” - A widening of a structural feature (i.e. dilational fault).

“Dissolution” - the process whereby a metal is dissolved and becomes amenable to separation from the gangue material.

“Electrum” - A naturally occurring alloy of gold and silver.

“Epithermal” - Said of a mineral deposit that deposited from warm waters at shallow depth under conditions in the lower ranges of temperature and pressure (used to describe mineral veins and ore deposits).

“Exploration” - Activities associated with ascertaining the existence, location, extent or quality of mineralization, including economic and technical evaluations of mineralization.

“Flotation” - The process whereby certain chemicals are added to the material fed to the leach circuit in order to float the desired minerals to produce a concentrate of the mineral to be processed. This process can be carried out in flotation cells.

“Ginguro / ginguro banding” – Gray to black colloform bands of quartz colored by sulfides.

“Grade” - The quantity of metal per unit mass of ore expressed as a percentage or, for gold, as grams of gold per tonne of ore.

“Grinding” - Reducing rock to the consistency of fine sand by crushing and abrading in a rotating steel grinding mill.

“Hydrothermal / hydrothermal processes” - Said of the subsurface movement of hot mineral-laden fluids.

“Kaolinite” - A clay mineral, with the chemical composition $Al_2Si_2O_4$.

“Illite” - A light-colored clay mineral of the muscovite mica group.

“IP-Res/Pole-dipole/PDP-IP” (Induced Polarization-Resistivity) - Electrical geophysical methods used in mineral exploration to measure the flow, or resistance to flow, of an artificial electrical current.

“Landsat Thematic Mapper” – One of the satellite-based, earth observing sensors introduced in the Landsat program, images which are commonly used in mineral exploration.

“Leaching” – Dissolution of gold from the crushed and milled material, including reclaimed slime followed by absorption and concentration onto the activated carbon.

“Low sulfidation mineral deposits” - Low sulfidation epithermal deposits represent the uppermost, or most distal, parts of intrusion-related hydrothermal mineral systems. They generally form within 500 meters of surface but may extend to 1-2 kilometers.

“Massif” – A geologically distinct mass of rock or a series of connected masses.

“Milling” or “mill” - The comminution of the ore, although the term has come to cover the broad range of machinery inside the treatment plant where the gold is separated from the ore.

“Mineralization” - The presence of a target mineral in a mass of host rock.

“Mineralized shoot” - A concentration of mineralization deposited in a portion of a vein or fissure. The shoot consists of the most valuable part(s) of the mineral deposit.

“Net smelter return” or “NSR” - The volume of a refined metal sold during the relevant period multiplied by the average spot metal price and the average exchange rate for the period, less refining, transport and insurance costs.

“Open pit” - Mining in which the ore is extracted from a pit. The geometry of the pit may vary with the characteristics of the ore body.

“Ore” - A mixture of material containing minerals from which at least one of the minerals can be mined and processed at an economic profit.

“Ore body” - A well-defined mass of material of sufficient mineral content to make extraction economically viable.

“Ore grade” - The average amount of gold contained in a tonne of gold-bearing ore expressed in grams per tonne.

“Ore reserves” or “reserves” - That part of a mineral deposit which could be economically and legally extracted or produced at the time of the reserve determination.

“Ounce” - One troy ounce, which equals 31.1035 grams.

“Porphyritic” - An adjective used to describe igneous rocks with a distinct difference in the size of mineral crystals, with the larger crystals known as phenocrysts. Both extrusive and intrusive rocks can be porphyritic.

“Prospect” – When used as a verb, it means to investigate a site with insufficient data available on mineralization to determine if minerals are economically recoverable or a site deemed favorable for mineral exploration activities.

“RAB” (Rotary Air Blast) - A drilling technique to collect small fragments of rock by rotation and percussion (impact) using high-pressure air to move fragments to surface between the drill pipe and the wall rock.

“RC or RVC” - Reverse circulation: A drilling technique in which rock fragments are moved up the center tube of a special type of rotary, percussion drilling machine.

“Refining” - The final stage of metal production in which final impurities are removed from the molten metal by introducing air and fluxes. The impurities are removed as gases or slag.

“Sampling” - Taking small pieces of rock at intervals along exposed mineralization for assay (to determine the mineral content).

“Silicified” - Said of a geologic formation that has been replaced by silica, as quartz, chalcedony, or opal.

“Sinter” - A near surface incrustation formed by precipitation of minerals from hot or cold mineral waters in springs, lakes, or streams; specif. siliceous sinter and calcareous sinter.

“Smectite” - A group of hydrous, aluminous phyllosilicate minerals (micas) with variable amounts of iron, magnesium, alkali metals, and other cations. Common accessory mineral in hydrothermal mineral deposits.

“Sulfosalts” - A group of sulfide minerals that contain one or more true metals, sulfur, and either of the semi-metals antimony, arsenic, or bismuth. They are generally soft, have a metallic luster.

“Tenement” - A piece of land held by an owner. Also referred to as concession or claim.

NOTE REGARDING FORWARD-LOOKING STATEMENTS

Certain statements contained in this report (including information incorporated by reference) are “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and the United States Private Securities Litigation Reform Act of 1995, and “forward-looking information” within the meaning of applicable Canadian securities legislation. The Company’s forward-looking statements include current expectations and projections about future production, results, performance, prospects and opportunities, including reserves and other mineralization. The Company has tried to identify these forward-looking statements by using words such as “may,” “might,” “will,” “expect,” “anticipate,” “believe,” “could,” “intend,” “plan,” “estimate” and similar expressions. While these forward-looking statements, and any assumptions upon which they are based, are made in good faith and reflect our current judgment regarding the direction of our business, actual results will almost always vary, sometimes materially, from any estimates, predictions, projections, assumptions or other future performance suggested herein. Such estimates, projections or other forward-looking statements involve various risks and uncertainties and other factors, including the risks in the section titled “Risk Factors” below, which may cause our actual results, levels of activities, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements. We caution the reader that important factors in some cases have affected and, in the

future, could materially affect actual results and cause actual results to differ materially from the results expressed in any such estimates, projections or other forward-looking statements. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. Except as required by applicable law, including the securities laws of the United States, we do not intend to update any of the forward-looking statements to conform those statements to actual results.

Please see “Item 3. Key Information — D. Risk Factors” for a further discussion of certain factors that may cause actual results to differ materially from those indicated by our forward-looking statements. The statements contained in Item 4 – “Information on the Company”, Item 5 – “Operating and Financial Review and Prospects” and Item 11 – “Quantitative and Qualitative Disclosures about Market Risk” are inherently subject to a variety of risks and uncertainties that could cause actual results, performance or achievements to differ significantly.

Item 2. Offer Statistics and Expected Timetable

Not applicable.

Item 3. Key Information

A. [Reserved]

Not Applicable.

B. Capitalization and Indebtedness

Not Applicable.

C. Reasons for the Offer and Use of Proceeds

Not Applicable.

D. Risk Factors

The Company’s securities are highly speculative and subject to a number of risks. Investors should not consider an investment in the Company’s securities unless they are capable of sustaining an economic loss of the entire investment. Furthermore, if other risks not presently known to the Company, or that the Company does not currently believe to be significant, occur or become significant, the Company’s financial condition and results of operations could suffer and the trading price of the common shares could decline. In addition to the other information presented in this Annual Report, the following risk factors should be given special consideration when evaluating an investment in the Company’s securities.

Investing in the Company's common shares involves a high degree of risk. Prospective investors should carefully consider the risks described below, together with all of the other information included in or referred to in this report, before purchasing shares of our common shares. There are numerous and varied risks, known and unknown, that may prevent the Company from achieving our goals. The risks described below are not the only ones the Company will face. If any of these risks actually occurs, the Company's business, financial condition or results of operation may be materially adversely affected. In such case, the trading price of the Company's common shares could decline and investors in the Company's common shares could lose all or part of their investment. The information in this Annual Report is complete and accurate as of the dates referenced herein, but the information may change after such date.

Should one or more of the foregoing risks or uncertainties materialize or should the underlying assumptions of the Company's business prove incorrect, actual results may differ significantly from those anticipated, believed, estimated, expected, intended or planned.

Additional funding requirements

The continuing exploration and development of the Company's projects will depend upon the ability to obtain funding through debt financing, equity financing, the joint venturing of projects, or other means. There is no assurance that the Company will be successful in obtaining the required financing for these or other purposes, including for general working capital or that any funds raised will be sufficient for the purposes contemplated. Failure to obtain additional funding on a timely basis could cause the Company to reduce or terminate its proposed operations. There can be no certainty that capital will be available to the Company on acceptable terms. If additional funds are raised through further issuances of equity or convertible debt securities, existing shareholders could suffer significant dilution, and any new equity securities issued could have rights, preferences and privileges superior to those they possess prior to such issuances. Any debt financing secured in the future could involve restrictive covenants relating to capital raising activities and other financial and operational matters, which may make it more difficult for the Company to obtain additional capital and to pursue business opportunities, including potential acquisitions.

COVID-19

On March 11, 2020, the World Health Organization (WHO) stated the "public health emergency of international concern" and declared the state of pandemic worldwide due to the COVID-19's outbreak in Wuhan, China and its subsequent global spread.

Following this statement, on March 19, 2020, the Argentine Government ordered the "Social, Preventive and Compulsory Isolation" ("ASPO" for its acronym in Spanish), by Necessity and Urgency Decree No. 297/2020, imposing border closures and stringent restrictions on domestic circulation of individuals. Such measures comprised several exceptions, including activities that were considered "essential" and, therefore, were excluded from such restrictions. Successive Necessity and Urgency Decrees extended the term of the mentioned measures until November 8, 2020. As of November 9, 2020, by Necessity and Urgency Decree No. 875/2020 and its amendments, it was established the Preventive and Compulsory Social Distancing ("DISPO" for its acronym in Spanish) that is in full force and effect through February 28, 2021 and can be extended for as long as it may be considered necessary in view of the epidemiological situation.

Subsequently, on December 30, 2020, the Ministry of Health's Resolution No. 2883/2020, approving the "Strategic COVID-19 Vaccination Plan" in the Republic of Argentina, was issued. It aimed to reduce morbidity, mortality, and socio-economic impacts of the pandemic, based on the stepped and progressive vaccination of certain population groups.

Because of the various measures adopted by the Argentine government, and within the scenario of the economic activity's generalised recession, the Company has implemented a protocol establishing the working conditions to operate in strict compliance with the public health standards issued by national and provincial authorities, in order to minimize the risk of contagion of co-workers, clients and providers, and to enable the business continuity. It is worth emphasising that, as of the date of this Annual Report, the COVID-19 pandemic continues to be a prevalent situation, the duration of which is uncertain, and the measures taken by the different authorities (national, provincial, and pertaining to town) in response thereto are constantly evolving.

Although the continuity of the Company's operation has not been significantly affected, the extent of COVID-19's impact on the operational and financial performance will depend on the evolution of events (including the spread rate and duration, as well as the national and international governmental measures taken in such regard) and on the impact this situation may cause on our main clients, employees, and providers; all of which is uncertain and, at present, not possible to foresee. However, the Company's Management does not anticipate that such impacts will affect the business continuity or the ability to meet financial commitments in the next twelve (12) months.

Limited operating history

The Company has a history of producing metals from its current mineral properties, which continued through 2021 albeit at a lower level than that of the prior year. The Company is subject to all of the risks associated with establishing new mining operations and business enterprises including:

- the timing and cost, which can be considerable, of the construction of mining and processing facilities;
- the availability and costs of skilled labour and mining equipment;
- the availability and cost of appropriate smelting and/or refining arrangements;
- the need to obtain necessary environmental and other governmental approvals and permits, and the timing of those approvals and permits; and
- the availability of funds to finance construction and development activities.

The costs, timing and complexities of mine construction and development are increased by the location of the Company's mining properties. It is common in new mining operations to experience unexpected problems and delays during construction, development, and mine start-up. In addition, delays in the commencement of mineral production often occur. Accordingly, there are no assurances that the Company's activities will result in profitable mining operations or that the Company will successfully establish mining operations or profitably produce metals at any of its properties. Actual capital costs, production and economic returns may differ significantly from those the Company has anticipated and there are no assurances that any future development activities will result in profitable mining operations.

Economics of Developing Mineral Properties

The exploration for and development of mineral deposits involves significant risks, which even a combination of careful evaluation, experience and knowledge may not eliminate. While the discovery of an ore body may result in substantial rewards, few properties that are explored are ultimately developed into producing mines. Major expenses may be required to locate and establish mineral reserves, to develop metallurgical processes and to construct mining and processing facilities at a particular site. It is impossible to ensure that the exploration or development programs planned by the Company will result in a profitable commercial mining operation. Whether a mineral deposit will be commercially viable depends on a number of factors, some of which are: the particular attributes of the deposit, such as size, grade and proximity to

infrastructure; metal prices that are highly cyclical; and government regulations, including regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of minerals and environmental protection. The exact effect of these factors cannot be accurately predicted, but the combination of these factors may result in Patagonia not receiving an adequate return on invested capital. There is no certainty that the expenditures made by Patagonia towards the search and evaluation of mineral deposits will result in discoveries or development of commercial quantities of ore.

Exploration risks

Resource exploration, development and operations are highly speculative, characterized by a number of significant risks, which even a combination of careful evaluation, experience and knowledge may not eliminate, including, among other things, unprofitable efforts resulting not only from the failure to discover mineral reserves but from finding mineral reserves which, though present, are insufficient in quantity and quality to return a profit from production. Few properties that are explored are ultimately developed into production. The majority of exploration companies fail to ever locate an economic deposit. Substantial expenditures are required to establish mineral reserves. No assurance can be given that minerals will be discovered in sufficient grade or quantities to justify commercial operations or that funds required for development can be obtained on a timely basis. Whether an exploration property will be commercially viable depends on a number of factors, some of which are: the particular attributes of the deposit, such as size, grade and proximity to infrastructure; metal prices, which are highly cyclical; and government regulations, including regulations relating to prices, taxes, royalties, land tenure, land use, and environmental protection. The exact effect of these factors cannot accurately be predicted, but the combination of these factors may result in the Company not receiving an adequate return on invested capital or not obtaining the required capital to develop any project. The Company will evaluate the political and economic environment in considering any properties for acquisition. There can be no assurance that significant restrictions will not be placed on the exploration areas and any other properties the Company may acquire or its operations. Such restrictions may have a material adverse effect on the Company's business and results of operation.

Ability to exploit current and future discoveries

It may not always be possible for the Company to participate in the exploitation of successful discoveries. Such exploitation may involve the need to obtain licences or clearances from the relevant authorities, which may not be available on a timely basis or may require conditions to be satisfied and/or the exercise of discretion by such authorities. It may or may not be possible for such conditions to be satisfied, and such conditions may prove uneconomic or not practical. Furthermore, the decision to proceed to further exploration may require the participation of other companies whose interests and objectives may not be consistent with those of the Company. Such further exploitation may also require the Company to meet or commit to financial obligations which it may not have anticipated or may not be able to commit to due to a lack of funds or an inability to raise funds.

Higher than normal capital costs to take some of the Company's projects into production

None of the Company's mineral properties have a significant operating history upon which the Company can accurately base estimates of future operating costs. Decisions about the development of these and other mineral properties will ultimately be based upon studies which derive estimates of cash operating costs based upon, among other things:

- anticipated tonnage, grades and metallurgical characteristics of the material to be mined and processed;
- anticipated recovery rates of gold, copper and other metals from the processed material;

- cash operating costs of comparable facilities and equipment; and
- anticipated climatic conditions.

Cash operating costs, production and economic returns, and other estimates contained in studies or estimates prepared by or for the Company, if prepared, may differ significantly from those anticipated by current studies and estimates, and there can be no assurance that the Company's actual operating costs will not be higher than currently anticipated. Whether income will result from projects undergoing exploration and development programs depends on the successful establishment of mining operations. Successful project development is affected by factors such as:

- costs;
- actual mineralization;
- consistency and reliability of ore grades; and
- commodity prices.

The design and construction of efficient processing facilities, the existence of competent operational management and prudent financial administration, as well as the availability and reliability of appropriately skilled and experienced consultants also can affect successful project development.

Increased demand for and cost of contract mining services and equipment

Recent increases in metal prices have encouraged increases in mining exploration, development and construction activities, which have resulted in increased demand for and cost of contract exploration, development and construction services and equipment. Increased demand for and cost of services and equipment could cause project costs to increase materially, resulting in delays if services or equipment cannot be obtained in a timely manner due to inadequate availability, and increase potential scheduling difficulties and costs due to the need to coordinate the availability of services or equipment, any of which could materially increase project exploration, development or construction costs, result in project delays or both.

Dependence on limited mining properties

The Calcatreu and Cap-Oeste properties are the Company's primary properties believed to have, with additional work and studies, as envisioned in either pre-feasibility or feasibility studies, and investment, potential for the future generation of revenue. Any adverse development affecting the progress of the Calcatreu and Cap-Oeste properties such as, but not limited to, obtaining financing on commercially suitable terms, hiring suitable personnel and mining contractors, or securing supply agreements on commercially suitable terms, may have a material adverse effect of the Company's financial performance and results of operations.

Most exploration projects do not result in the discovery of commercially mineable ore deposits and no assurance can be given that any particular level of mining or metallurgical recovery will be realized or that any identified mineral deposit will ever qualify as a mineral reserve which can be legally and economically exploited. Estimates of reserves, mineral deposits and production costs can also be affected by such factors as environmental permitting regulations and requirements, weather conditions, environmental factors, unforeseen technical difficulties, unusual or unexpected geological formations and work interruptions. Material changes in ore reserves, grades, stripping ratios or recovery rates may affect the economic viability of any project.

In addition, if the Company discovers a mineral deposit, it would typically take several years from the initial phases of exploration until production is achieved. During this time, the economic feasibility of production may change. As a result of these uncertainties, there can be no assurance that the Company will successfully acquire additional mineral rights.

Changes in laws

Changes to any of the laws, rules, regulations or policies to which the Company is subject could have a significant impact on the Company's business. There can be no assurance that the Company will be able to comply with any future laws, rules, regulations and policies. Failure by the Company to comply with applicable laws, rules, regulations and policies may subject it to civil or regulatory proceedings, including fines or injunctions, which may have a material adverse effect on the Company's business, financial condition, liquidity and results of operations. In addition, compliance with any future laws, rules, regulations and policies could negatively impact the Company's profitability and have a material adverse effect on its business, financial condition, liquidity and results of operations.

Dependence on the directors and officers

The Company's future success is dependent on its ability to attract and retain suitably qualified directors and officers in the future and the ability of such directors and officers to deal effectively with complex risks and relationships and to execute the Company's exploration plan and future development plans. The success of the Company is, and will continue to be, to a significant extent dependent on the expertise and experience of its directors and officers and the loss of one or more of the directors or officers could have a material adverse effect on the Company. The success of the Company will depend on the ability of its directors and officers to interpret market, engineering, metallurgical and geological data correctly and to interpret and respond to economic, market and other conditions in order to locate and adopt appropriate investment opportunities, monitor such investments and ultimately, if required, successfully divest such investments. Furthermore, two of the Company's directors (Messrs. Miguens and Hunt) collectively, hold directly or indirectly 62.84% of the Company's issued and outstanding common shares on a non-diluted basis and the Company has agreed that they each have a right (the "Participation Rights") to maintain their percentage interest in the Company upon certain equity issuances undertaken by the Company until December 31, 2022 so long as their ownership interest is not less than 20%. As a result of their shareholdings and the Participation Rights, they have the ability, among other things, to approve significant corporate transactions and delay or prevent a change of control of the Company that could otherwise be beneficial to minority shareholders. They will also have the ability to control the outcome of any matter submitted for the vote or consent of the Company's shareholders. In some cases, their interests may not be the same as those of the Company's other shareholders, and conflicts of interest may arise from time to time that may be resolved in a manner detrimental to the Company or its minority shareholders.

Dependence on key personnel

The Company has a small management team and the loss of a key individual, or its inability to attract suitably qualified persons in the future, could have a material adverse effect on the Company.

Dependence on third party contractors

The Company is heavily dependent on third party contractors for exploration work as well as for developing, operating and maintaining a workable system for mining and processing. A failure of a contractor or disputes with a contractor could have a material adverse effect on the Company, its business,

the results of operations and its financial condition. The Company is also exposed to risks associated with the failure of counterparties to perform their operational or other obligations to the Company in compliance with the terms of contractual arrangements between the Company and such counterparties.

Labour and employment matters

Adverse changes in labor regulations may have a material adverse effect on the Company's business, results of operations and financial condition.

Failure of third parties' reviews, reports and projections to be accurate

The Company relies upon third parties to provide analysis, reviews, reports, advice and opinions regarding the Company's projects. There is a risk that such analysis, reviews, reports, advice, opinions and projects are inaccurate, in particular with respect to resource estimation, process development and recommendations for products to be produced as well as with respect to economic assessment including estimating the capital and operating costs of the Company's projects and forecasting potential future revenue streams. Uncertainties are also inherent in such estimations.

Litigation

Legal proceedings may arise from time to time in the course of the Company's business. There have been a number of cases where the rights and privileges of mining companies have been subject to litigation. The directors cannot preclude that such litigation may be brought against the Company in the future from time to time or that it may be subject to any other form of litigation.

Political instability, sovereign and regulatory risk

The Company's mineral exploration activities and future project development could be affected in varying degrees by political instability and changes in government regulation relating to foreign investment and the mining business, including expropriation. Operations may also be affected in varying degrees by possible terrorism, military conflict, crime, fluctuations in currency rates and high inflation. In addition, from time to time, governments may nationalize private businesses, including mining companies. There can be no assurance that the governments of countries where the Company or its affiliates operate or the governments with whom the Company works will not nationalize mining companies and their assets in the future or impose burdensome obligations or restrictions. There can also be no assurance that foreign governments will not impose burdensome obligations or restrictions on the Company, the Company's affiliates or their projects, or will not put in place exploitation regulations in a timely manner or on commercial terms sufficiently attractive to the Company to enable development of its projects.

Environmental risk and hazards

There is no assurance that future changes in environmental regulation, if any, will not adversely affect the Company's operations. Governmental approvals and permits are currently and may in future be required in connection with the Company's operations. To the extent such approvals are required and not obtained, the Company may be curtailed or prohibited from proceeding with planned exploration or development of mineral properties. Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Parties engaged in mining operations may be required to compensate those suffering loss or damage by reason of the mining activities and may have civil or criminal fines or penalties imposed for violations of applicable laws and regulations.

General project risks

Whether a mineral deposit will be commercially viable depends on a number of factors, which may include: the particular attributes of the deposit, such as size, grade and proximity to infrastructure, metal prices, which are highly cyclical, and government/regulatory body regulations, including regulations relating to prices, taxes, royalties, tenure, land use, importing and exporting of minerals and environmental protection. The exact effect of these factors cannot be accurately predicted, but the combination of these factors may result in the Company not receiving an adequate return on invested capital. Some of the Company's projects are at an early stage of exploration. Any further development of such projects will only follow upon obtaining satisfactory exploration results, environmental impact assessments and the scrutiny of environmental, technical and feasibility reports. Substantial expenditures are required to discover and establish sufficient resources and ore reserves and to develop the mining and processing facilities and infrastructure at any sites selected for mining and processing. There can be no assurance that the Company will be able to realize sufficient financing to facilitate such development.

Management of growth

The ability of the Company to implement its strategy requires effective planning and management control systems. The Company's plans may place a significant strain on its management, operational, financial and personnel resources. The Company's future growth and prospects will depend on its ability to manage this growth and to continue to expand and improve operational, financial and management information and quality control systems on a timely basis, whilst at the same time maintaining effective cost controls. Any failure to expand and improve operational, financial and management information and quality control systems in line with the Company's growth could have a material adverse effect on the Company's business, financial condition and results of operations. There are also risks associated with establishing and maintaining systems of internal controls.

Commodities Price Risk

The profitability of mining operations is significantly affected by changes in the market price of metals and the cost of power, petroleum fuels and oil. The level of interest rates, the rate of inflation, world supply of metals and stability of exchange rates can all cause significant fluctuations in base metal, precious metal, chemical reagent and oil prices. Such external economic factors are in turn influenced by changes in international investment patterns, monetary systems and political developments. The price of gold, silver and other minerals, and oil has fluctuated widely in recent years. Depending on the price of gold, silver, and the cost of power, chemical reagents, petroleum fuels and oil, cash flow from mining operations may not be sufficient to cover the Company's operating costs or costs of servicing debt. The Company is not currently a party to any commodity hedging contracts.

Permits and licences

Operations of the Company require or will require licences and permits from various governmental authorities. The Company anticipates that it will be able to obtain in the future all necessary licences and permits to carry on the activities which it intends to conduct, and that it intends to comply in all material respects with the terms of such licences and permits. However, there can be no guarantee that the Company will be able to obtain at all or on reasonable terms, and maintain, at all times, all necessary licences and permits required to undertake its proposed exploration and development or to place its properties into commercial production and to operate mining facilities thereon. In addition, the cost of compliance with changes in governmental regulations has the potential to reduce the profitability of any producing operations or preclude the economic development of any property.

Competition

The international natural resources industry is highly competitive. Competition in the mining exploration and development business is intense and could adversely affect the ability of the Company to suitably develop its properties. The Company will be competing with many other exploration and development companies possessing greater financial resources and technical facilities. There is a risk that competitors may find substitutes for the metals for which the Company is exploring or find lower cost sources of, or more efficient processes to extract, such metals. There can be no assurance that the necessary funds can be raised or that any projected work will be completed.

Environmental matters

All of the Company's exploration and development operations will be subject to environmental permitting and regulations, which can make operations expensive or prohibit them altogether. The Company may be subject to potential risks and liabilities associated with pollution of the environment and the disposal of waste products that could occur as a result of its exploration, development and production activities.

To the extent the Company is subject to environmental liabilities, the payment of such liabilities or the costs that it may incur to remedy environmental pollution would reduce funds otherwise available to it and could have a material adverse effect on the Company. If the Company is unable to fully remedy an environmental problem, it might be required to suspend operations or enter into interim compliance measures pending completion of the required remedy. The potential exposure may be significant and could have a material adverse effect on the Company.

All of the Company's exploration, development and production activities will be subject to regulation under one or more environmental laws and regulations. Many of the regulations require the Company to obtain permits for its activities. The Company must update and review its permits from time to time, and is subject to environmental impact analyses and public review processes prior to approval of the additional activities.

It is possible that future changes in applicable laws, regulations and permits or changes in their enforcement or regulatory interpretation could have a significant impact on some portion of the Company's business, causing those activities to be economically re-evaluated at that time.

Conflicts of interest

Certain of the officers and directors of Patagonia are also directors, officers or shareholders of other companies. Such associations may give rise to conflicts of interest from time to time. The Company's board of directors (the "Board") will be required by law to act honestly and in good faith with a view to the best interests of the Company and to disclose any interest which they may have in any project or opportunity of the Company. If a conflict arises at a meeting of the Board, any director in a conflict will disclose his interest and abstain from voting on such matter. In determining whether or not the Company will participate in any project or opportunity, the director will primarily consider the degree of risk to which the Company may be exposed and its financial position at that time.

Title to Mining Properties

Acquiring the title to the mining property is a detailed and prolonged process. Title may be challenged or be subject to legal disputes. Although the Company has researched in the most diligent and fullest possible manner the title to its mining properties, there is no certainty that its title will not be disputed or challenged in the future.

Currency Risk

As a result of the use of different currencies, the Company is subject to foreign currency fluctuations which may materially affect its business, results of operations and financial condition.

Liquidity risk

The Company might incur further debt in order to fund its exploration and operational programs, which would reduce its financial flexibility and could have a material adverse effect on the Company's business, financial condition or results of operations. The Company's ability to meet its debt obligations and reduce its level of indebtedness depends on future performance. General economic conditions, mineral prices and financial, business and other factors affect the Company's operations and future performance. Many of these factors are beyond the Company's control. The Company cannot assure investors that it will be able to generate sufficient cash flow to pay the interest on its debt or that future working capital, borrowings or equity financing will be available to pay or refinance such debt. Factors that will affect its ability to raise cash through an offering of securities or a refinancing of any debt include financial market conditions and the value of its assets and performance at the time the Company needs capital. The Company cannot assure investors that it will have sufficient funds to make such payments. If the Company does not have sufficient funds and is otherwise unable to negotiate renewals of its borrowings or arrange new financing, it might have to sell significant assets. Any such sale could have a material adverse effect on the Company's business, operations and financial results.

Failure to obtain additional financing, if required, on a timely basis, could cause the Company to reduce or delay its proposed operations.

The majority of sources of funds expected to be available to the Company for potential acquisitions and its exploration and development projects are in large portion expected to be derived from the issuance of equity. While the Company has been able in the past to obtain equity financing and has secured shareholder loans to undertake planned exploration and development programs, there is no assurance that the Company will be able to obtain adequate financing in the future or that such financing will be on terms advantageous to the Company. Although the Company intends to generate operating income and cash flow from mining operations, there can be no assurances that the Company will have sustainable economic operations or be able to generate positive operating income or cash flow from such operations.

Disruption from non-governmental organizations

As is the case with any businesses which operate in the mining industry, the Company may become subject to pressure and lobbying from non-governmental organizations. There is a risk that the demands and actions of non-governmental organizations may cause significant disruption to the Company's business which may have a material adverse effect on its operations and financial condition.

Infrastructure

Exploration, processing, development and exploitation activities depend on adequate infrastructure. Reliable roads, bridges, ports, rail, power sources and water supply are important requirements, which affect capital and operating costs. Unusual or infrequent weather phenomena, sabotage, government or other interference in the maintenance or provision of such infrastructure could adversely affect the future operations of the Company.

Uninsurable Risks

Exploration, development and production operations on mineral properties involve numerous risks, including unexpected or unusual geological operating conditions, rock bursts, cave-ins, fires, floods, earthquakes and other environmental occurrences, as well as political and social instability. It is not always possible to obtain insurance against all such risks and the Company may decide not to insure against certain risks because of high premiums or other reasons. Should such liabilities arise, they could reduce or eliminate any further profitability and result in increasing costs and a decline in the value of the securities of the Company.

Operating hazards and risks

Mineral resource exploration and development and the operation of mineral and chemical processing facilities involves many risks, which even a combination of experience, knowledge and careful evaluation may not be able to overcome. These hazards include failure of equipment or processing facilities to operate in accordance with specifications or expectations, cost escalation, unavailability of materials and equipment, government or regulatory action or delays, unanticipated events related to health, safety and environmental matters, formation pressures, fires, power outages, labor disruptions, flooding, explosions, and the inability to obtain suitable or adequate machinery, equipment or labor.

Operations in which the Company will have a direct or indirect interest will be subject to all the hazards and risks normally incidental to exploration, development and production of mineral products as well as the operation of a processing facility, any of which could result in damage to or destruction of producing facilities, damage to life and property, environmental damage and possible legal liability for any or all damage. Although the Company intends to maintain liability insurance in an amount which it considers adequate, the nature of these risks is such that liabilities could exceed policy limits, in which event the Company could incur significant costs that could have a materially adverse effect upon its financial condition.

Health and safety

Mining, like many other exploration or extractive natural resource industries, is subject to potential risks and liabilities due to accidents that could result in serious injury or death. The impact of such accidents could affect the profitability of the operations, cause an interruption to operations, lead to a loss of licenses, affect the reputation of the Company and its ability to obtain further licenses, damage community relations and reduce the perceived appeal of the Company as an employer.

There is no assurance that the Company has been or will at all times be in full compliance with all laws and regulations or hold, and be in full compliance with, all required health and safety permits. The potential costs and delays associated with compliance with such laws, regulations and permits could prevent the Company from proceeding with the development of a project or the operation or further development of a project, and any noncompliance therewith may adversely affect the Company's business, financial condition and results of operations. Amendments to current laws, regulations and permits governing operations and activities of mining companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in exploration expenses, capital expenditures or production costs, reduction in the levels of production at producing properties, or abandonment or delays in development of new mining properties.

Influence of joint-venture partners

Exploration, development and mining projects are often conducted through joint-venture agreements which may require the unanimous approval of the parties to the joint-venture or their representatives for certain fundamental decisions relating to the governance and operations of the joint-venture. As a result, a party may have a veto right, or similar power, with respect to such decisions which could lead to a deadlock and negatively impact or limit the future business operations or financial position of the Company.

Fluctuations in the price of consumed commodities

Prices and availability of commodities or inputs consumed or used in connection with exploration, development and mining, such as diesel, oil, electricity, chemicals and reagents, fluctuate and affect the costs of production at the Company's operations. These fluctuations can be unpredictable, can occur over short periods of time and may have a materially adverse impact on operating costs or the timing and costs of various projects.

Risks relating to Argentina

The Company may be responsible for corruption and anti-bribery law violations

The Company's business will be subject to the Corruption of Foreign Public Officials Act (Canada) ("CFPOA"), which generally prohibit companies and company employees from engaging in bribery or other prohibited payments to foreign officials for the purpose of obtaining or retaining business. Since all of the Company's interests will be located in Argentina, there is a risk of potential CFPOA violations. In addition, the Company will be subject to the anti-bribery laws of Argentina and of any other countries in which it conducts business in the future. The Company's employees or other agents may, without its knowledge and despite its best efforts, engage in prohibited conduct under the Company's policies and procedures and the CFPOA or other anti-bribery laws for which the Company may be held responsible. If the Company's employees or other agents are found to have engaged in such practices, the Company could suffer severe penalties and other consequences that may have a material adverse effect on its business, financial condition and results of operations.

Project production and profitability

The commercial viability of mineral deposits of the kind located and believed to be located on the Martha Mine and the its other Patagonia properties is dependent upon a number of factors, including the quality, size, grade, and other attributes of the deposits and the proximity to, and availability of, infrastructure necessary to develop and exploit minerals on a commercial scale.

Potential political, social and economic instability in Argentina

The principal mineral property interests of the Company will be located exclusively in Argentina. Although the Company believes that the current conditions in Argentina are relatively stable and conducive to conducting business, the Company's current and future mineral exploration and mining activities could be impacted by adverse political or economic developments. Such adverse developments may include widespread civil unrest and rebellion, the imposition of unfavorable government regulations on foreign investment, production and extraction, prices, exports, income taxes, expropriation of property, environmental compliance and worker safety.

Argentinean taxes affecting cost estimates provided by the Company

The Company will be required to pay taxes in Argentina on earnings generated from its Argentinean operations and these taxes are subject to change in the future. The operating costs at the Company's Argentinean operations have assumed a current Argentinean tax rate, which may be increased in the future. Accordingly, cost estimates may not represent an accurate statement of future tax costs.

Mining tax regime risk

Mining tax regimes in foreign jurisdictions are subject to differing interpretations and are subject to constant change and may include fiscal stability guarantees. The Company's interpretation of taxation law as applied to its transactions and activities may not coincide with that of the tax authorities. As a result, transactions may be challenged by tax authorities and the Company's operations may be assessed, which could result in significant additional taxes, penalties and interest.

Risks associated with the transportation of concentrate

The concentrates to be produced by the Company have significant value and will be loaded onto road vehicles for transport. The geographic location of the Martha Mine and its other Patagonia properties in Argentina and trucking routes taken through the country to the smelters and ports for delivery, give rise to risks including concentrate theft, road blocks and terrorist attacks, losses caused by adverse weather conditions, delays in delivery of shipments, and environmental liabilities in the event of an accident or spill.

Theft of concentrate

The Company may have significant concentrate inventories at its facilities or on consignment at other warehouses awaiting shipment. The Company will take steps to secure its concentrate, whether in storage or in transit. The Company will have insurance coverage for its inventory while in transit; however, recovery of the full market value may not always be possible. Despite these risk mitigation measures, there remains a continued risk that theft of concentrate may have a material impact on the Company's financial results.

Risks Relating to Emerging Markets

The Company operates in Argentina, which is considered an emerging market. Emerging market investments generally pose a greater degree of risk than investment in more mature market economies because the economies in the developing world are more susceptible to destabilization resulting from domestic and international developments. The Company's operations in Argentina expose it to heightened risks relating to prevailing political and socioeconomic conditions which have historically included, but are not limited to: high rates of inflation; military repression; social and labour unrest; violent crime; civil disturbance; extreme fluctuations in currency exchange rates; expropriation and nationalization; renegotiation or nullification of existing concessions, licenses, permits and contracts; changes in taxation policies; underdeveloped industrial and economic infrastructure; unenforceability of contractual rights; restrictions on foreign exchange and repatriation; and changing political norms, currency controls and governmental regulations that favour or require the Company to award contracts in, employ citizens of, or purchase supplies from, a particular jurisdiction.

As an example, in May 2012, the previous government of Argentina re-nationalized YPF, the country's largest oil and gas company. There can be no assurance that the government of Argentina will not nationalize other businesses operating in the country, including the business of the Company. The Company has not purchased any "political risk" insurance coverage and currently has no plans to do so. Argentinean

regulators have broad authority to shut down and/or levy fines against operations that do not comply with regulations or standards. In addition to factors such as those listed above, the Company's mineral exploration and potential future mining activities in Argentina may also be affected in varying degrees by government regulations with respect to restrictions on production, price controls, foreign exchange controls, export controls, taxes, royalties, environmental legislation and mine safety. Such factors may prevent or restrict mining of some or all of any deposits which the Company may find on the Company's properties. Government authorities in emerging market countries often have a high degree of discretion and at times appear to act selectively or arbitrarily, without hearing or prior notice, and sometimes in a manner that may not be in full accordance with the law or that may be influenced by political or commercial considerations. Unlawful, selective or arbitrary governmental actions could include denial or withdrawal of licences, sudden and unexpected tax audits, forced liquidation, criminal prosecutions and civil actions. Although unlawful, selective or arbitrary government action may be challenged in court, such action, if directed at the Company or its shareholders, could have a material adverse effect on the Company's business, results of operations, financial condition and future prospects. Companies operating in emerging markets are subject from time to time to the illegal activities of others, corruption or claims of illegal activities. Often in these markets the bribery of officials remains common, relative to developed markets. Social instability caused by criminal activity and corruption could increase support for renewed central authority, nationalism or violence and thus materially adversely affect the Company's ability to conduct its business effectively. Such activities have not had a significant effect on the Company's operations; however, there can be no assurance that they will not in the future, in which case they could restrict the Company's operations, business, financial condition, results of operations and future prospects, and the value of the Company could be adversely affected by illegal activities by others, corruption or by claims, even if groundless, implicating the Company in illegal activities. Investors in emerging markets should be aware that these markets are subject to greater risk than more developed markets, including in some cases significant legal, fiscal, economic and political risks. Accordingly, investors should exercise particular care in evaluating the risks involved in an investment in the Company and must decide for themselves whether, in the light of those risks, their investment is appropriate. Generally, investment in emerging and developing markets is suitable only for sophisticated investors who fully appreciate the significance of the risks involved.

Risks Relating to the Company's Common Shares

If the Company's business is unsuccessful, its shareholders may lose their entire investment

Although shareholders will not be bound by or be personally liable for the Company's expenses, liabilities or obligations beyond their total original capital contributions, should the Company suffer a deficiency in funds with which to meet its obligations, the shareholders as a whole may lose their entire investment in the Company.

The price of the Company's common shares has been and may continue to be volatile

The common shares of the Company are currently listed and posted for trading on the TSX Venture Exchange (the "TSXV") under the symbol "PGDC". The trading price for the Company's common shares has been and is likely to continue to be highly volatile. Factors that could adversely affect the price of its common shares include:

- fluctuations in operating results;
- changes in governmental regulation;
- litigation;
- general stock market and economic conditions;
- number of shares available for trading (float); and

- inclusion in or dropping from stock indexes.

As a “foreign private issuer”, the Company is exempt from certain sections of the Exchange Act, which results in shareholders having less complete and timely data than if the Company were a domestic U.S. issuer

As a “foreign private issuer,” as defined under U.S. securities laws, the Company is exempt from certain sections of the U.S. Securities Exchange Act of 1934, as amended (the “Exchange Act”). In particular, it is exempt from Section 14 proxy rules which are applicable to domestic U.S. issuers. The submission of proxy and annual meeting of shareholder information (prepared to Canadian standards) on Form 6-K has typically been more limited than the submissions required of U.S. issuers and results in shareholders having less complete and timely data, including, among others, with respect to disclosure of: (i) personal and corporate relationships and age of directors and officers; (ii) material legal proceedings involving the Company, affiliates of the Company, and directors, officers promoters and control persons; (iii) the identity of principal shareholders and certain significant employees; (iv) related party transactions; (v) audit fees and change of auditors; (vi) voting policies and procedures; (vii) executive compensation; and (viii) composition of the compensation committee. In addition, due to the company’s status as a foreign private issuer, the officers, directors and principal shareholders of the Company are exempt from the short-swing insider disclosure and profit recovery provisions of Section 16 of the Exchange Act. Therefore, these officers, directors and principal shareholders are exempt from short-swing profits which apply to insiders of U.S. issuers. The foregoing exemption results in shareholders having less data in this regard than is available with respect to U.S. issuers.

The Company could lose its “foreign private issuer” status in the future, which could result in significant additional costs and expenses.

In order to maintain the Company’s current status as a “foreign private issuer” (as defined in Rule 405 under the United States Securities Act of 1933), where more than 50% of its outstanding voting securities are directly or indirectly owned by residents of the United States, the Company must not have any of the following: (i) a majority of its executive officers or directors being U.S. citizens or residents, (ii) more than 50% of its assets being located in the United States, or (iii) its business being principally administered in the United States. If the Company were to lose its foreign private issuer status:

- it would no longer be exempt from certain of the provisions of U.S. securities laws, such as Regulation FD and the Section 16 short swing profit rules;
- it would be required to commence reporting on forms required of U.S. companies, such as Forms 10-K, 10-Q and 8-K, rather than the forms currently available to it, such as Forms 20-F and 6-K;
- it would be subject to additional restrictions on offers and sales of securities outside the United States, including in Canada; and
- if it engages in capital raising activities after losing its foreign private issuer status, there is a higher likelihood that investors may require the Company to file resale registration statements with the SEC as a condition to any such financing.

Investors’ interests in the Company will be diluted and investors may suffer dilution in their net book value per share if the Company issues additional shares or raise funds through the sale of equity securities

The Company’s constating documents currently authorize the issuance of an unlimited number of its common shares without par value. If it is required to issue any additional shares or enter into private placements to raise financing through the sale of equity securities, investors’ interests in the Company will

be diluted and investors may suffer dilution in their net book value per share depending on the price at which such securities are sold. If the Company issues any such additional shares, such issuances also will cause a reduction in the proportionate ownership and voting power of all other shareholders. Further, any such issuance may result in a change in control of the Company.

The Company does not intend to pay dividends on any investment in its common shares

The Company has never paid any cash dividends and currently does not intend to pay any dividends for the foreseeable future. To the extent that the Company requires additional funding currently not provided for in its financing plan, its funding sources may prohibit the payment of a dividend. Because the Company does not intend to declare dividends, any gain on an investment in the Company will need to come through an increase in the market price of its common shares. This may never happen and investors may lose all of their investment in the Company.

Item 4. Information on the Company

A. History and Development of the Company

The Company was incorporated under the name “Sinomar Capital Corp.” under the *Business Corporations Act* (Alberta) on January 10, 2006. On August 5, 2008, the common shares were listed for trading on the TSXV under the symbol “SMM.P”. On January 5, 2010, it was acquired by HuntMountain Resources Ltd. and HuntMountain Investments LLC and subsequently changed its name to “Hunt Mining Corp.” and began trading on the TSXV under the symbol “HMX” on February 5, 2010. On November 5, 2013, Hunt Mining Corp. continued into British Columbia from Alberta under the *Business Corporations Act* (British Columbia). On July 24, 2019, PGP completed the RTO, following which Hunt Mining Corp. changed its name to “Patagonia Gold Corp.”

The common shares of the Company are currently listed and posted for trading on the TSXV under the symbol “PGDC”. The Company is a reporting issuer in each of the Provinces of Canada except Québec and files its continuous disclosure documents with the applicable Canadian securities authorities in such provinces.

The Company’s head office is located at Av. Del Libertador 498, Piso 26, C1001ABR, Buenos Aires, Argentina. The registered address and the records office of the Company is located at 2200 – 885 West Georgia Street, Vancouver, British Columbia, V6C 3E8 (telephone: (+5411) 52786950).

The SEC maintains an Internet site at <http://www.sec.gov> that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC.

The Company maintains an Internet site at <https://patagoniagold.com/>.

Principal Capital Expenditures/Divestitures over the last Three Fiscal Years

The table below for the years ended December 31, 2019 to December 31, 2021 contains selected financial data (in thousands of U.S. dollars) prepared in accordance with IFRS derived from the Company’s audited consolidated financial statements for the periods ending on such dates.

	Mineral Property Expenditures*	Exploration Expenses	Property, Plant and Equipment Expenditures*	Total
2019	\$2,926	\$2,608	\$777	\$6,311
2020	\$942	\$2,303	\$976	\$4,221
2021	\$2,951	\$4,604	\$1,839	\$9,394

*Excludes any assets acquired as part of the RTO in 2019

The Company did not have any divestitures over the last three fiscal years.

B. Business Overview

Patagonia is an exploration and development company, engaged in the exploration of mineral properties and exploitation of mineral resources and mineral reserves in the Santa Cruz, Rio Negro and Chubut Provinces of Argentina. Patagonia's material properties are Calcatreu in the Rio Negro province of Argentina and Cap-Oeste in the Santa Cruz province of Argentina.

Calcatreu Property

The Company's principal material property is Calcatreu located in south-central Rio Negro province approximately 80 km southwest of the town of Jacobacci. The Calcatreu Property is located in the Jurassic-aged Somuncura Massif along the NW- to SE-oriented, regional-scale Gastre Fault System; a highly prospective belt of Mesozoic-aged rocks and structures and base and precious metal deposits occurring in both the provinces of Chubut and Rio Negro, Argentina. The massif is similar in geologic character to the larger Deseado Massif in the province of Santa Cruz to the south. Patagonia has also recently acquired new concessions, totaling more than 100,000 hectares ("ha") along this belt in the Rio Negro province. The Calcatreu Property is a gold and silver property acquired in January 2018 through the acquisition of Minera Aquiline Argentina SA, a subsidiary of Pan American Silver Corp. ("Pan American") and the Company's immediate aim is to commence a drilling program and advance the property to a pre-feasibility study stage.

Cap-Oeste Property

The Cap-Oeste Property is located within a structural corridor extending six kilometers from the La Pampa prospect in the northwest to the Tango prospect in the southeast. The Company has initiated a pre-feasibility study to assess the potential technical and economic extraction of mineral resources. The Company is now focused on evaluating the development of these mineral resources by underground mining. The Company is expecting quotations with respect to potential construction of an underground mine at the Cap-Oeste Property. Material processing options are being considered and may include utilizing the Company's flotation facilities at its Martha Mine Property (as defined herein), about 100 kms to the southeast of Cap-Oeste.

The Cap-Oeste Property generated revenues of \$13,927,000 during the year ended December 31, 2021, \$12,417,000 during the year ended December 31, 2020 and \$14,903,000 during the year ended December 31, 2019.

Prior to the RTO

La Josefina and La Valenciana Properties

In March 2007, the Company acquired from the Provincial State-owned mining company, Fomento Minero de Santa Cruz Sociedad del Estado (“Fomicruz”) the exploration and development rights to the La Josefina property (the “La Josefina Property”). The La Josefina Property is situated approximately 450 kilometers northwest of the city of Rio Gallegos, in the Santa Cruz province of Argentina in the Patagonia region. The La Josefina Property occupies approximately 52,800 ha and comprises approximately 90% of all meters drilled by Patagonia.

In 2010, a subsidiary of the Company, Cerro Cazador S.A. (“CCSA”), was awarded certain prospects and mining rights to the La Valenciana Property (“La Valenciana Property”). On November 15, 2012, the Company entered into a definitive acquisition agreement between the Company and Fomicruz (the “Valenciana Acquisition Agreement”) whereby the Company acquired certain rights for seven years to explore and develop the La Valenciana Property. The La Valenciana Property encompasses an area of approximately 29,600 ha contiguous to the La Josefina Property to the east. The La Valenciana Property is comprised of 11 MDs (Manifestaciones de Descubrimientos) covering segments of Estancia Cañadon Grande, Estancia Flecha Negra, Estancia Las Vallas, Estancia La Florentina, Estancia La Valenciana and Estancia La Modesta.

Pursuant to the Valenciana Acquisition Agreement, the Company has spent \$5,000,000 in exploration on the La Valenciana Property over seven years.

On July 24, 2007, the Company entered into an agreement (which has subsequently been amended) with Fomicruz (the “Josefina JV Agreement”). The Josefina JV Agreement between Fomicruz and CCSA was terminated by mutual consent of its parties. Patagonia Gold S.A. and Fomicruz entered into a new commercial agreement on June 10, 2020 that sets out terms and conditions under which Fomicruz will grant a mining usufruct over the La Josefina Property and the La Valenciana Property. In July 2020, a proposal for exploration on the La Josefina Property and the La Valenciana Property was submitted to Fomicruz by Patagonia, whereby Patagonia committed to make a \$5,000,000 investment in these properties over a 24-month period. As a result, Fomicruz started an administrative dossier identified as “Private Initiative for Mining Exploration on La Josefina, La Valenciana and Abril” which has to comply with several procedural steps that will be completed once the province of Santa Cruz enacts a decree approving the private initiative. Fomicruz will then grant Patagonia an interest in the La Josefina - 8 - Property and the La Valenciana Property in exchange for a 5% net smelter returns (“NSR”) royalty on future production from both properties and a 2% NSR from the future production on the Company’s Abril property (the “Abril Property”). The Abril Property encompasses an area of approximately 2,000 ha and is situated approximately 100 kilometers south of the La Josefina Property and the La Valenciana Property and approximately three kilometers from the Martha Mine Property. The Abril Property is comprised of four Manifestaciones de Descubrimiento (“MDs”) covering segments of Estancia 1 of the Abril Property.

Martha Mine Property

On May 11, 2016, the Company acquired the assets of the Mina Martha property (the “Martha Mine” or “Mina Martha”) from Coeur Mining, Inc. (“Coeur”). The Martha Mine Property is located in the province of Santa Cruz, Argentina, approximately 50 road kilometers to the east-northeast of the town of Gobernador Gregores.

The Martha Mine Property consists of approximately 7,850 hectares of concessions, various buildings and facilities, surface and underground mining and support equipment, a current 240 tonnes per day crushing,

grinding and flotation plant that can be increased up to 480 tonnes per day utilizing equipment already in place which can be erected at a nominal cost, tailings facility, various stockpiles and waste dumps, employee living and cafeteria quarters, and miscellaneous physical materials. The Company restored and repaired the physical assets acquired in the purchase during the latter part of 2016 and the first quarter of 2017. In addition, the Company has access to surface ranch lands surrounding the mine and mill site that are approximately 35,700 hectares in size.

As a result of the acquisition of the Martha Mine Property, the Company pays to Royal Gold Inc. a 2% net smelter return royalty on all production from the Martha Mine Property. In addition, the Company is required to pay the Santa Cruz provincial government a 3% pit-head royalty from future production.

Bajo Pobre Property

In January 2006, CCSA (now operating as Patagonia Gold S.A.) signed a letter of intent with FK Minera S.A., an arm's length party to CCSA and CCSA's former parent corporation, to acquire a 100% interest in the Bajo Pobre Property (the "Bajo Pobre Property"), a gold exploration property located in the province of Santa Cruz, Argentina. On March 27, 2007, CCSA signed a definitive lease purchase agreement with FK Minera S.A. to acquire the Bajo Pobre property pursuant to which CCSA acquired a 100% equity interest in the Bajo Pobre Property by making cash payments and exploration expenditures over a five-year earn-in period.

The Bajo Pobre Property covers 3,190 hectares and is mainly on the Estancia Bajo Pobre. The property is located 90 kilometers south of the town of Las Heras. The Bajo Pobre Property does not have current mineral resources or mineral reserves. No exploration activity took place in 2021 on the Bajo Pobre Property and no exploration activity is planned for the immediate future.

El Gateado Property

In March 2006, CCSA acquired the right to conduct exploration on the El Gateado property through a claim staking process for a period of at least 1,000 days, commencing after the government issues a formal claim notice, and to retain 100% ownership of any mineral deposit found within. El Gateado is a 10,000 hectares exploration concession filed with the Santa Cruz Provincial mining authority. The El Gateado property is located in the north-central part of the Santa Cruz province, contiguous to the La Josefina Property on the east.

The Company has not yet received a formal claim notice pertaining to the El Gateado property. Should a mineral deposit be discovered, CCSA has the exclusive option to file for mining rights on the property. The surface rights of the El Gateado claim are held by the following ranches: Estancia Los Ventisqueros, Estancia La Primavera, Estancia La Virginia and Estancia Piedra Labrada. The El Gateado claims were filed with the government under file #406.776/DPS/06.

No exploration activity took place on El Gateado in 2021 and no exploration activity is planned for the immediate future.

Chilean Joint Venture

In July 2015, Patagonia Gold Sociedad Contractual Minera ("PG Chile") a subsidiary of the Company incorporated pursuant to the laws of Chile, entered into an exploration and purchase option agreement with Consultora Geoexplora Ltd. ("Geoexplora"), which granted Geoexplora the option to acquire up to 100% of PG Chile's Chilean exploitation mining concessions (the "Chilean JV"). This agreement included the Los Domos Gold Property, located in Chile Chico, Province of General Carrera, Chile located in the

Patagonian region south Santiago, Chile. In September 2016, Geoexplora assigned its rights and interest in the Chilean JV to Terrane Minerals SpA. On December 27, 2018, Terrane Minerals SpA in turn assigned its rights and interest in the Chilean JV to Southern Gold SpA (“Southern”).

Under the second phase of the Chilean JV, Southern was granted an option to earn up to 75% interest in the Chilean properties upon drilling a minimum of 1,000 DDH meters during the initial phase. On August 13, 2019, PG Chile and Southern incorporated a new Chilean company, Equus Patagonia SpA (“Equus”) and PG Chile’s rights over the mining properties were subsequently conveyed to Equus. Equus is controlled by Southern which holds 75% of the issued and outstanding shares of Equus, while PG Chile owns the remaining 25% of Equus’ issued and outstanding shares.

If Southern conducts an additional 2,500 DDH meters under the second phase and PG Chile elects not to contribute, on a pro rata basis, to the corresponding expenses for any exploration campaign under the second phase, Southern’s shareholding in Equus can be increased by up to an additional 15% of the issued and outstanding shares of Equus, leaving PG Chile with a 10% interest in Equus. In case PG Chile chooses not to contribute, on a pro rata basis, to the corresponding expenses for any exploration campaign under the third phase of the Chilean JV, its shareholding in Equus may be reduced to up to 5% of the issued and outstanding shares of Equus, leaving PG Chile the option to: i) keep its 5% shareholding or ii) convert its 5% shareholding in Equus into a 1.5% NSR, leaving Southern with a 100% shareholding in Equus.

After the RTO

On July 24, 2019, the Company completed the RTO, which was effected by way of a scheme of arrangement under the U.K. Companies Act 2006, pursuant to which the former shareholders of PGP received approximately 10.76 Common Shares for each outstanding common share of PGP.

On August 13, 2019, the Company announced an offer letter agreement with Latin Metals Inc. (“Latin Metals”) to acquire the Mina Angela Property (the “Mina Angela Property”). The Mina Angela property is situated in the Somuncura Massif of southern Argentina and is comprised of 44 individual claims located approximately 50 km east-southeast of the Calcatreu Property.

On December 13, 2019, the Company appointed Mr. Jorge Sanguin as Chief Operating Officer of the Company.

On January 1, 2020, Patagonia Gold S.A. merged with CCSA and all rights and obligations held by CCSA were assumed by Patagonia Gold S.A. as the resulting entity. CCSA has now been dissolved.

On February 21, 2020, the Company commenced a normal course issuer bid pursuant to which the Company may purchase for cancellation up to 15,897,199 Common Shares (representing approximately 5% of 317,943,990 issued and outstanding Common Shares as of February 17, 2020) over a 12-month period.

On March 16, 2020, the Company announced that it had entered into an amending agreement to extend the period by which it had to enter into a definitive agreement to acquire the Mina Angela Property until September 12, 2020. In consideration of granting the extension, the Company agreed to pay Latin Metals \$100,000, \$50,000 of which was in consideration of the extension with the balance being a partial prepayment of the \$250,000 that the Company anticipated paying to Latin Metals on signing of the definitive agreement.

On August 12, 2020, the Company announced recommencement of mining and leaching operations at its Lomada de Leiva mine (“Lomada”) in the western part of the Santa Cruz Province of Argentina.

On September 15, 2020, the Company announced that it had signed the definitive option agreement with Latin Metals for the Mina Angela Property. Upon signing the agreement, the Company paid Latin Metals \$200,000, representing the balance of the first earn-in payment. It is expected that Patagonia will pay the second earn-in payment of \$250,000 if it exercises the option to acquire the Mina Angela Property in the six-months after the date of the definitive option agreement. A further, and final payment of \$500,000 is expected to be paid within 30 days of verification that the legal restrictions preventing development of mining activity in the Chubut Province of Argentina and at the Mina Angela property have been lifted in such a manner that Patagonia thereafter has the ability to perform exploration and exploitation mining activities on Mina Angela property. In addition, Latin Metals will be entitled to receive a 1.25% NSR from future production, half of which can be repurchased by Patagonia for \$1 million. On March 12, 2021, the Company exercised the option to acquire 100% interest in the Mina Angela property and paid the second earn-in payment of \$250,000.

On October 8, 2020, the Company announced that it had received a preliminary Environmental Permit (the "Preliminary Permit") for mining and leaching operations at Lomada in the western part of the Santa Cruz Province of Argentina.

On October 20, 2020, the Company announced that it had entered into an agreement with Tim Hunt to convert an aggregate of \$10 million of outstanding debt into Common Shares of the Company (the "Debt Conversion") at a price per Common Share equal to \$0.30. The debt to be converted in connection with the Debt Conversion includes \$4,821,835 of principal and accrued interest owed to Mr. Hunt by the Company, and \$5,178,165 in accounts payable owed to Mr. Hunt in respect of interest, rent and administration expenses accrued by the Company. Following the Debt Conversion, the balance of the \$1,457,807 in accounts payable owed to Mr. Hunt and a related party to Mr. Hunt in respect of interest, wages, rent and administration expenses is expected to be settled in full by December 10, 2020 by a cash payment in the amount of \$720,397 plus 7% accrued interest. The Debt Conversion was completed on October 30, 2020.

On November 17, 2020, the Company announced it had entered into an agreement with Cantomi Uruguay S.A. ("Cantomi") to extend the maturity of the Cantomi Loan (as defined below) to December 31, 2022. Cantomi provided a \$15 million loan facility at 5% interest per annum (the "Cantomi Loan"), which was to mature on March 31, 2021. Other than the extension of the maturity date to December 31, 2022, all other terms of the Cantomi Loan remain unchanged. The Company also agreed to extend the maturity date of its bank indebtedness, being its operating lines of credit, from January 31, 2021 to December 31, 2021. Other than the extension of the maturity date to December 31, 2021, all other terms of the operating lines of credit will remain unchanged.

On November 17, 2020, Patagonia agreed to settle a total of \$30,000 and £74,000 of debt owed to certain directors of the Company for director fees for the period July 2019 to September 2020 and former directors of its wholly owned subsidiary to whom director fees are owed for the period July 2016 to July 2019 (the "Outstanding Fees"). On November 24, 2020, the Company settled the Outstanding Fees by issuing a total of 1,201,111 common shares at a deemed price of \$0.14, being the closing price of the Shares on the TSXV on the trading day prior to the date of such agreement.

On November 23, 2020, the Company announced that it had obtained a provisional permit to advance development of Cap-Oeste Property.

On March 9, 2021, the Company announced that it had obtained definitive permits for the development of the Cap-Oeste Property and the restart of the Lomada de Leiva Property.

On March 10, 2021, the Company closed a brokered private placement offering (the "Offering") for total gross proceeds of CAD \$9.3 million. In connection with the Offering, the Company issued an aggregate of

104,086,063 units of the Company (the “Units”) at a price of CAD \$0.09 per Unit (the “Unit Price”). Each Unit consisted of one common share of the Company and one common share purchase warrant. Each warrant entitles the holder thereof to purchase one common share of the Company at an exercise price of CAD \$0.13 until March 10, 2024. In connection with the Offering, the Company paid CAD \$225,862 in cash commission to the agents and issued 2,509,586 compensation options. The compensation options are exercisable to acquire Units of the Company at the Unit Price until March 10, 2024.

On April 19, 2021, the Company entered into definitive agreements to acquire two properties in Argentina. Patagonia entered into a definitive option agreement dated April 15, 2021 (the “Option Agreement”) with Mirasol Resources Ltd. (“Mirasol”) and Mirasol’s wholly owned subsidiary Australis S.A. (“Australis” and together with Mirasol, the “Vendors”), which grants Patagonia an option to acquire a 75% undivided interest in and to Australis’ rights and interest in the Homenaje property (the “Homenaje Property”) located in Santa Cruz Province, Argentina. Patagonia also entered into a definitive transfer agreement dated April 15, 2021 (the “Transfer Agreement”) with the Vendors, which grants Patagonia a 100% undivided interest in and to Australis’ rights and interest in the Nico property (the “Nico Property”) located in Santa Cruz Province, Argentina. The Nico Property was previously explored by Mirasol, while the Homenaje Property, which is adjacent to two mining operations, holds targets that have yet to be drilled.

Pursuant to the Option Agreement, Patagonia has an option to earn a 75% interest in the Homenaje Property over six years upon achievement of the following (collectively, the “Earn-In Obligations”):

- an initial work program over six years of \$2,550,000 in exploration expenditures, including 2,500 meters of drilling, on the Homenaje Property;
- expenditures on exploration activities with respect to the Homenaje Property (the “Exploration Expenditures”) of a minimum of \$400,000 over the first 18-months;
- following completion of the initial Exploration Expenditures and drilling obligations due within the first 30 months, Patagonia must complete a minimum of \$400,000 of Exploration Expenditures in any 12-month period, and a minimum of \$200,000 of Exploration Expenditures in any six-month period; and
- a pre-feasibility study, prepared in accordance with NI 43-101, for a mineral resource of not less than 300,000 ounces of gold equivalent.

Upon Patagonia completing the Earn-In Obligations, Patagonia and the Vendors will hold 75% and 25%, respectively, in a joint venture company holding the Homenaje Property. If either party’s equity interest is diluted below 10%, it will convert to a 2% NSR royalty.

Pursuant to the terms of the Transfer Agreement, Patagonia has acquired the Vendors’ interest in the Nico Property in exchange for a 1.5% NSR royalty. If, by the end of third-year, the Nico Property has not been operated as a producing mine, or Patagonia has not produced and shipped minerals in commercial quantities (excluding bulk sampling or pilot plant operations, if any) from the Nico Property for a period of 30 consecutive days, Mirasol will have the right to regain full ownership of the Nico Property at no cost.

On December 7, 2021, Patagonia entered into a new exploration and exploitation agreement with the Provincial State-owned mining company (“Fomicruz”) for certain properties in the Santa Cruz Province, Argentina, pursuant to which it has granted a net smelter returns royalty. The new agreement complements the corporate reorganization whereby the Company’s subsidiaries, Patagonia Gold SA (“PGSA”) and Cerro Cazador SA, merged and continued as one legal entity, previously announced in January 2020. The new agreement is expected to facilitate the development of an exploration program for the La Josefina and La Valenciana gold and silver properties. In addition, the agreement includes the option on a new property (the

“Abril Property”) located adjacent to the Martha mine and plant, which is underexplored. Highlights of this optimization include:

- Executed a new exploration agreement with an exploitation option with Fomicruz for the following three properties: the La Josefina property, the La Valenciana property and the Abril property (the “Properties”);
- Executed a net smelter returns royalty agreement, pursuant to which Fomicruz is granted a 2% royalty on the mining properties that it has already contributed to PGSA and on the Abril Property, with the exception of the La Josefina and the La Valenciana properties, where Fomicruz is granted a 5% royalty;
- \$5 million commitment to developing an exploration program for the Properties during a 2-year period beginning once the environmental permits for the exploration development of the Properties are obtained and;
- Fomicruz reduced its interest in PGSA from 10% to 5% in accordance with the restructuring announced in January 2020.

On December 22, 2021, the Company announced it had entered into an agreement with Cantomi Uruguay S.A. (“Cantomi”) to extend the maturity of the Cantomi Loan (as defined below) to December 31, 2023. Cantomi provided a \$15 million loan facility at 5% interest per annum (the “Cantomi Loan”), which was to mature on March 31, 2021. Other than the extension of the maturity date to December 31, 2023, all other terms of the Cantomi Loan remain unchanged. The Company also agreed to extend the maturity date of its bank indebtedness, being its operating lines of credit, from January 31, 2022 to December 31, 2022. Other than the extension of the maturity date to December 31, 2022, all other terms of the operating lines of credit will remain unchanged.

C. Organizational Structure

The following table sets forth all of the Company’s material subsidiaries, their jurisdictions of incorporation, percentage of voting securities beneficially owned or controlled by the Company and the purpose of each subsidiary.

Corporation	Incorporation	Percentage ownership	Functional currency	Business purpose
Patagonia Gold S.A. (PGSA)	Argentina	95.3	US\$	Production and Exploration Stage
Minera Minamalu S.A.	Argentina	100	US\$	Exploration Stage
Huemules S.A.	Argentina	100	US\$	Exploration Stage
Leleque Exploración S.A.	Argentina	100	US\$	Exploration Stage
Patagonia Gold Limited (formerly Patagonia Gold PLC)	UK	100	GBP\$	Holding
Minera Aquiline S.A.U.	Argentina	100	US\$	Exploration Stage
Patagonia Gold Canada Inc.	Canada	100	CAD\$	Holding
Patagonia Gold Chile S.C.M.	Chile	100	CH\$	Exploration Stage
Ganadera Patagonia S.R.L.	Argentina	100	US\$	Land Holding
1272680 B.C. Ltd (formerly 1494716 Alberta Ltd.)	Canada	100	CAD\$	Nominee Shareholder

D. Property, Plant, and Equipment

The following is a summary of the Company’s operations, together with an update on exploration activities for the year to date. Except as otherwise noted, Donald J. Birak, independent geologist and Registered Member of the Society for Mining, Metallurgy and Exploration and Fellow of the Australasian Institute for Mining and Metallurgy (“AusIMM”), is the Qualified Person who has reviewed and approved the scientific and technical information contained herein.

Although the Company has commenced extraction of minerals at the Cap-Oeste and Lomada properties, the Company does not have defined mineral reserves as defined under Regulation S-K, subpart 1300 and therefore all of the mining properties are considered to be in the exploration stage. The Company has approximately 422 mining properties, which are listed in the *Summary of Mineral Properties* below. The Calcatreu Property and Cap-Oeste Property are the only properties that the Company considers material at this time.

Mineral Resources

The Company is in the process of updating its mineral resource estimates and preparing supporting documents for its two, material properties – Calcatreu and Cap-Oeste.

Mineral Rights

The principal means of securing mineral rights in Argentina are summarized as follows:

- **Cateo:** A Cateo is an exploration permit for a parcel of land measure in units of 500 ha and can vary in size from a single unit to a maximum of 20 units (10,000 ha). The holding of a Cateo is associated with relinquishing ground based on a formula varying from 300 to 700 days and reduction in ground held to 50% of that originally claimed;
- **Manifestación de Descubrimiento (“MD”):** A Cateo can be converted into an MD after discovering a mineral occurrence of interest within a Cateo. The owner can apply for an MD around his discovery at any time within the period of the corresponding Cateo. The maximum area of an MD is 3,000 ha and remains in force until such time as the property is legally surveyed, an essential prior step to the longer term granting of a “Mina”; and
- **Minas:** Minas are mining concessions or leases which permit mining on a commercial basis. The area of a mina is measured in “pertenencias” and will vary in size according to the distinction between vein and disseminated targets believed to occur on the property. Individual mining authorities (the provinces) may determine the number of pertenencias required to cover the geologic extent of the mineral deposit in question. Once granted, minas have an indefinite term assuming exploration, development or mining is in progress.

All mineral rights described above are considered forms of real property and can be sold, leased or assigned to third parties on a commercial basis. The mining code contains environmental and safety provisions, administered by the provinces. Prior to conducting operations, operators in these regions must submit an environmental impact report to the respective provincial government, describing the proposed operation and the methods to be used to prevent undue environmental damage.

Exploration Properties

Material Properties

Calcatreu Property

The following information regarding the Calcatreu Property has been summarized from and is qualified in its entirety by the technical report entitled “NI 43-101 Technical Report, Mineral Resource Estimate on the Calcatreu Gold-Silver Project, Rio Negro Province, Argentina” dated effective December 31, 2018 and prepared by Brian Fitzpatrick, B.Sc., MAusIMM CP (Geo), of Cube Consulting Pty Ltd. (the “Calcatreu Technical Report”), and readers should consult the full text of the Calcatreu Technical Report to obtain further particulars regarding the Calcatreu Property. The disclosure in this is, in most instances, a direct extract of the disclosure contained in the Calcatreu Technical Report, a copy of which is available under Patagonia’s profile on SEDAR at www.sedar.com. Certain capitalized terms used in this section not otherwise defined have the meanings ascribed to them in the Calcatreu Technical Report. The Calcatreu Technical Report was prepared in connection with the RTO and references in this summary to Patagonia are to PGP pre-RTO. The NI 43-101 Technical Report, Mineral Resource Estimate on the Calcatreu Gold-Silver Project, Rio Negro Province, Argentina was prepared in accordance with NI 43-101 in accordance with Canadian standards for reporting of mineral resource estimates, which differ in some respects from the disclosure requirements under S-K 1300 required under United States law.

Location

The Calcatreu Property is a contiguous collection concessions comprising approximately 75,000 has in provinces of Rio Negro and Chubut in central Argentina. The property is located approximately 240 km by road southeast of the community of San Carlos de Bariloche and 1,500 km southwest of Buenos Aires. Calcatreu straddles the southern boundary of Rio Negro Province and the northern boundary of Chubut Province. The closest town is Ingeniero Jacobacci, a community of approximately 6,300 residents, 90 km by road to the north of Calcatreu.

Infrastructure

Calcatreu is an exploration stage property with a 20-person modular camp to service exploration activities, and numerous, gravel roads.

History

Epithermal gold and silver mineralization was discovered in 1997 by La Source Compagnie Minière. As a result of the assays received and the vein textures noted, two prospecting licenses were staked in the same year, and regional reconnaissance activities commenced the following year.

The property passed to Normandy Mining of Australia when it purchased La Source from the French Government in 1998. Normandy, through its Argentine subsidiary Minera Normandy Argentina SA, completed a large amount of exploration on the property, consisting of reconnaissance sampling and core drilling. Follow-up work from the initial, anomalous samples, led to the discovery of 11 significant vein systems within the Calcatreu district. Drilling was completed in four campaigns by Normandy SA between 1999 and 2001. A total of 65 drill holes, for 7,992.2 m, were completed on the two main deposits.

Newmont purchased Normandy in 2002 and took control of Calcatreu. Newmont decided that Calcatreu did not meet corporate size objectives and elected to dispose of the Argentina subsidiary of Normandy in September 2002 and sold it to Aquiline Resources Inc. The sale was in June 2003. Subsequently, Aquiline completed a small due diligence drilling program in July 2003 after finalizing the deal on the property.

Pan American Silver Corp. then acquired the Calcatreu properties in 2010 through the acquisition of Aquiline. Pan American completed a twin hole program consisting of 30 core holes in 2011.

On 28 December 2017, the Patagonia Gold Corp (the “Company”). announced that it had entered into a Definitive Agreement with Pan American to acquire the Calcatreu properties. On 18 May 2018, the acquisition was completed transferring the property to a wholly owned subsidiary of the Company.

Description of title and rights

The following list summarizes the licenses/concessions, titles and rights of the property.

Calcatreu Property Mineral Title, Santa Cruz Province, Argentina

1. "ha" - hectares

Surface rights in Argentina are not associated with title to either a mining lease or exploration claim and must be negotiated with the landowner. Patagonia has negotiated surface land agreements to conduct exploration and mining activities with landowners within the Calcatreu Property properties. All agreements are in place and require monthly fees payable by Patagonia to the landholders for 1 years from March 2022, and can be extended by mutual consent of the parties.

The following map shows the location of the various licenses on the Calcatreu Property. The bold, black outline denotes a Mining Group of ten concessions on the property ("Grupo Minero Calcatreu") in a process established by the Argentine Mining Code.

Mineral Concessions covering the Calcatreu Property

Condition, past and planned work, stage of development (exploration, development or production)

Calcatreu is an exploration stage property with numerous roads and drill sites that served past surface exploration work. The Company maintains the roads and sites in good condition to facilitate its future exploration activities. In 2022, the Company has plans to advance a pre-feasibility study of the potential for surface mining and mineral processing at the Calcatreu Property.

Cost or book value of property, plant and equipment

Calcatreu has a 20-person modular camp to service exploration activities with a cost of \$405 thousands, two power generators with a cost of \$433 thousands and others equipment with a cost of \$222 thousands.

Encumbrances, including current and future permitting requirements and timelines, permit, conditions, and violations and fines

The Company has been actively working the Calcatreu Property since acquisition. It has sufficient permits, in good standing, to allow for continued exploration activities. In Argentina, permits to conducted mineral exploration, mining and metal recovery operations are issued by the mining and environmental authorities of the province where the concession is located; in the case of Calcatreu, the authorities of Rio Negro and Chubut provinces. For 2021, all fees were made by the Company to allow its continued activities. The “Mining Group” of ten contiguous concessions, was formally approved by the mining authority which allows the Company to unify its filing with the authority on the core of the Calcatreu Property.

Future activities, including potential surface and underground mining and mineral of the various mineralized zones at Calcatreu, may require new permits.

There are two NSR royalties that are payable on the Calcatreu Property, being a 2.5% NSR royalty on the Nabel, Nabel 4 and Rebeca property, granted in favour of Franco-Nevada Corporation, and a 1.25% NSR royalty on the Calcatreu Property in favour of Maverix Metals Inc.

Exploration work

Exploration work completed in 2021 by the Company includes completion of 156 shallow percussion, rotary holes (1,708 mt), to extend vein-hosted mineralization to surface. In addition, 4,022.9 m have been excavated in 91 trenches and 146.8 m in 77 sawn channels. Approximately 1,000 line-km of ground magnetic surveying and 62.5 line-km of ground, induced polarization-resistivity (IP-Res) have been surveyed. In 2021, two new veins - Amancay and Loco – were discovered with the Company’s exploration work. Drilling on the new discoveries is planned. Total exploration costs in 2021 amounted to \$ 1,576 thousands.

Cap-Oeste Property

The following information regarding the Cap-Oeste Property has been summarized from and is qualified in its entirety by the technical report entitled “NI 43-101 Technical Report, Mineral Resource Estimate on the Cap-Oeste Gold-Silver Project, Santa Cruz Province, Argentina” dated effective December 31, 2018 and prepared by Brian Fitzpatrick, B.Sc., MAusIMM CP (Geo) (the “Cap-Oeste Technical Report”), and readers should consult the full text of the Cap-Oeste Project Technical Report to obtain further particulars regarding the Cap-Oeste Project. The disclosure in this Annual Report is, in most instances, a direct extract of the disclosure contained in the Cap-Oeste Technical Report, a copy of which is available under Patagonia’s profile on SEDAR at www.sedar.com. However, the technical information has been updated

with current information where applicable. Certain capitalized terms used in this section not otherwise defined have the meanings ascribed to them in the Cap-Oeste Project Technical Report. The Cap-Oeste Technical Report was prepared in connection with the RTO and references in this summary to Patagonia are to PGP pre-RTO. The Cap-Oeste Project Technical Report was prepared in accordance with NI 43-101 which differ in some respects from the disclosure requirements under S-K 1300 required under United States law.

Location

The Cap-Oeste Property, within the El Tranquilo concession block, is located in the central portion of the province of Santa Cruz, in the Department of Rio Chico, southern Argentina. The property area is accessed from Buenos Aires by commercial air service and a network of highways. The closest population centers, with air service, are Perito Moreno (210 km to the northwest by road) and Comodoro Rivadavia (600 km to the northeast by road). Cap Oeste can be accessed via National Highway 40 heading (RN40) south for approximately 166 km from Perito Moreno, passing via the township of Bajo Caracoles to a junction at Cinco Buzones. A secondary gravel road from Cinco Buzones leads east for 42 km to the property site, 5km northwest of the Estancia La Bajada.

Location of Cap-Oeste Property and the El Tranquilo Concession Block

Infrastructure

The property has a large infrastructure development, built to support open pit mining and precious metal recovery that commenced in October 2016. The infrastructure includes:

- Complete, modular camp for 200 people;
- Light and heavy vehicles and maintenance shop;
- Several kilometers of gravel roads;
- Lixiviation (“leach”) pad;
- Core shack;
- Exploration, development and production offices;
- Gold recovery room and;
- Warehouse.

History

The earliest, modern exploration in the area was conducted during the mid-1990's by Western Mining Corporation (“**WMC**”) and Homestake Mining Company (“**Homestake**”). Homestake initially selected the area using Landsat spectral imagery. The interpretation of the imagery highlighted the presence of regional-scale, northwest-trending lineaments. Large zones of coincident clay alteration served as a target for reconnaissance mapping and sampling. This work led to the staking of exploration claims by the Homestake subsidiary Minera Patagónica S.A., which held the ground until July 2002. Following the merger between Barrick Gold Corp (“**Barrick**”) and Homestake in December 2001, the ground was again staked as the El Tranquilo Property by Barrick subsidiary Minera Rodeo S.A.

Exploration of the El Tranquilo concession block spanned the period May 2002 to May 2006. As a result, several significant gold and silver targets were defined along a series of sub-parallel, northwest trending, structural lineaments – one of which proved to contain the Cap-Oeste (originally referred to by Barrick as the Zona Central), Breccia Valentina, and Vetas Norte mineralized zones.

Patagonia Gold S.A. (“**PGSA**”) began negotiations for the purchase of the properties in September 2006. Upon signing the purchase agreement with Barrick in February 2007, PGSA began exploration activities throughout the El Tranquilo concession block. During November-December 2008 the first trenching and mapping was conducted at Cap-Oeste, followed up by drilling programs from 2009 to 2013. From 2008 to 2015, work conducted throughout the Cap-Oeste and Cap-Oeste Sur Este (“**COSE**”) areas by PGSA defined gold-silver mineralization for potential open-pit and underground mining extraction.

Description of title and rights

The following list summarizes the licenses/concessions, titles and rights of the property.

Cap-Oeste (El Tranquilo Block) Mineral Title - Santa Cruz Province, Argentina				
Owner	License Name	Legal ID	Area (has) ^{1.}	Type of Concession
Minera Minamalu S.A.	Cerro Leon I	423.845/PG/09	3968,09	Mina
Minera Minamalu S.A.	Don Francisco I	427.420/MM/13	1822,00	Mina

1. "ha" - hectares

The following map shows the location of the various licenses on the Cap-Oeste Property within the El Tranquilo Concession Block.

Mineral Concessions covering the Cap-Oeste Property

Condition, past and planned work, stage of development (exploration, development or production)

Cap-Oeste, within the El Tranquilo license/concession block, is an advanced, exploration stage property. During 2021, the Company recovered 4,205 ounces of gold and 198,989 ounces of silver from its on-going precious metal recovery operations. No newly-mined material was added to the leach pad in 2021. In 2022, the Company has plans to continue with work on its pre-feasibility study of the potential for underground mining and mineral processing at the Cap-Oeste Property.

Cost or book value of property, plant and equipment

The property has a large infrastructure development, built to support open pit mining and precious metal recovery that commenced in October 2016. The infrastructure includes:

- Complete, modular camp for 200 people;
- Light and heavy vehicles and maintenance shop;
- Several kilometers of gravel roads;
- Lixiviation, “leach”, pad;
- Core shack;
- Exploration, development and production offices;
- Gold recovery room and;
- Warehouse.

The total cost without amortization of plant, facilities and equipment is \$20,734 thousands

Encumbrances, including current and future permitting requirements and timelines, permit conditions, and violations and fines

The Company has been actively working the Cap-Oeste Property, and the greater El Tranquilo block, since acquisition in 2007. It has sufficient permits, in good standing, to allow for continued exploration activities. In Argentina, permits to conducted mineral exploration, mining and metal recovery operations are issued by the mining and environmental authorities of the province where the concession is located; in the case of Cap-Oeste, the authorities of Santa Cruz. For 2021, all fees were made by the Company to allow its continued activities. Future activities, including potential underground mining and processing of the Cap-Oeste extension, may require new permits. Final approval of the Environmental Impact Assessment to conduct mining operations in Cap-Oeste underground was granted by the province of Santa Cruz in March 2021.

Exploration results

In 2021, the Company completed the following exploration work on the property:

- Created a new base map to facilitate generation of new exploration targets on the property;
- Identified the south-east extension of the Bonanza fault (the major control to mineralization at Cap-Oeste), reaching from the mine to the Monte Leon area approximately 10 km to the SSE of the Cap-Oeste mine and;
- Completed 690 new, shallow percussion rotary drill holes (15,707 meters) over Monte Leon and defined a near-surface zone of anomalous gold and silver mineralization, approximately 1,200 m long and 400 m wide.

Costs incurred for this work in 2021 were \$1,064 thousands, which included work to advance a pre-feasibility study on new mining and processing with a focus on underground mining of the depth and strike extension of the Cap-Oeste mineralization.

Other Properties

Lomada de Leiva (“Lomada”) Property

Lomada is located in the La Paloma property block approximately 120 kilometers to the north of the El Tranquilo Property block in the Santa Cruz province of Argentina. Lomada is an exploration stage property.

The Lomada mine was closed in May 2016 while production from the ongoing leaching continues, though at a reduced output. Given that the mineralized material from the Lomada open pit mine was originally placed on the heap leach pad without crushing, the Company decided to return to Lomada to reprocess this mineralized material. However, in mid-February 2019 the Company took the decision to cease operations and proceed with the closure of Lomada. During the year ended December 31, 2020, the Company was working on re-handling material of leach pad to regenerate the solution percolation and generate new channels of circulation of solution.

The Company has prepared an update to the closure plan presented and approved by the provincial authorities in 2017. The Company received the final approval in November 2019 and started with the work of remediation at the end of 2019. The work on the remediation had been halted due to the COVID-19 pandemic. On October 8, 2020, the Company announced that it had received a preliminary Environmental Permit (“Permit”) for a restart of mining and new leaching operations at its Lomada mine in the western part of the Santa Cruz Province of Argentina. Patagonia applied for the Permit in August 2020.

Following receipt of a preliminary permit in October 2020, the Company restarted operations at Lomada. In addition to production from this restart, the Company continues to recover precious metals from residual leaching of material already placed on the heap leach pad. On March 9, 2021, the Company announced that it had received a definitive environmental permit for Lomada. The mine is currently operating at a rate of 120,000 tonnes/month of total material. In the leach pad area, road construction has been completed and new mineralized material is being placed on the pad to be leached.

No exploration activities were undertaken at Lomada during the year ended December 31, 2021. Exploration work to reinterpret targets, Brecha La Emilia and Cerro Vasco, both in the north part of the property, is expected to start at the end of 2022.

The Company has reclamation and remediation obligations for Lomada of \$3.52 million as of December 31, 2021.

Martha Property

The Martha Property (“Martha” or “Mina Martha”) is located in the Province of Santa Cruz, Argentina. The closest community is the town of Gobernador Gregores, situated approximately 50 road kilometers to the west-southwest of Martha. The property is the site of past exploration for, and surface and underground mining and recovery of, silver and gold from epithermal veins and vein breccias, previously operated by Coeur Mining Inc. (formerly, Coeur d’Alene Mine Corp.) and Yamana Inc.

The Company acquired Martha as part of its RTO of Hunt in 2019. The land package at Martha consists of approximately 7,850 ha of concessions, various buildings and facilities, surface and underground mining and support equipment, a 480 tonne per day (maximum) crushing, grinding and flotation plant, tailings facility, various stockpiles and waste dumps, employee living and cafeteria quarters, and miscellaneous physical materials. In addition, the Company has access to surface ranch (“estancia”) lands surrounding the mine and mill site that are approximately 35,700 ha in size.

The property was purchased in 2016 by Cerro Cazador SA (CCSA), an Argentine subsidiary of Hunt, from an Argentine subsidiary of Coeur Mining Inc. (Coeur). The intent to purchase was announced February 10, 2016 and closed May 11, 2016 as disclosed by the Company on its website (www.patagoniagold.com). The processing plant at the Martha Property has an estimated useful life of 8 years as it is anticipated that this plant will be used to process mineral from Cap-Oeste underground, Martha Property and from La Josefina Property. Royal Gold Inc. holds a 2% Net Smelter Return (NSR) royalty on all production from the Martha property; the obligation for which transferred from Coeur to the Company (www.royalgold.com). In addition, the provincial government holds a 3% pit-head royalty from future production.

During the first quarter of 2020, a plan for reviewing near-mine targets (less than 5 kilometers away from the mill) was defined. Those remaining targets consist of outcropping veins-veinlets and included Veta del Medio System, Noroeste, Ivana, Martha Oeste, Martha Norte, Futuro and Sugar Hill, among others. A total 77 sawn channels were cut, and after encouraging results at Veta del Medio System, a RAB drill program was carried out to test mineralization at shallow depths. A total of 80 RAB drill holes (1,622.4 m of drilling, ranging from 6 to 25 m in depth) tested several targets.

Highly anomalous drill intercepts, ranging from 1 m grading 180 g/t Ag up to 3 m grading 2,566 g/t Ag (and 3.5 g/t Au), were returned from the Veta del Medio Norte. No exploration activities were undertaken at Martha Property during the first half of 2021.

The operations at the Martha plant continue to be on care and maintenance pending the discovery of new material to put through the plant.

The Company has reclamation and remediation obligations for the Mina Martha Property of \$1.7 million as of December 31, 2021.

Homenaje and Nico Properties

In 2021, the Company entered into definitive agreements to acquire two properties in Argentina. A definitive option agreement, dated April 15, 2021 (the “Option Agreement”), was executed with Mirasol Resources Ltd. (“Mirasol”) and Mirasol’s wholly owned subsidiary Australis S.A. (“Australis” and together with Mirasol, the “Vendors”), which grants Patagonia an option to acquire a 75% undivided, managing interest in and to Australis’ rights and interest in the Homenaje Property located in Santa Cruz Province, Argentina. The Company also entered into a definitive transfer agreement dated April 15, 2021 (the “Transfer Agreement”) with the Vendors, which grants Patagonia a 100% undivided interest in and to Australis’ rights and interest in the Nico Property located in Santa Cruz Province, Argentina. The Nico Property was previously explored by Mirasol, while the Homenaje Property, which is adjacent to two mining operations, holds targets that have yet to be drilled.

Pursuant to the Option Agreement, Patagonia has an option to earn a 75% interest in the Homenaje Property over six years upon achievement of the following (collectively, the “Earn-In Obligations”):

- an initial work program over six years of \$2.55 million in exploration expenditures, including 2,500 meters of drilling, on the Homenaje Property;
- expenditures on exploration activities with respect to the Homenaje Property (the “Exploration Expenditures”) of a minimum of \$0.4 million over the first 18-months;
- following completion of the initial Exploration Expenditures and drilling obligations due within the first 30 months, Patagonia must complete a minimum of \$0.4 million of Exploration Expenditures in any 12-month period, and a minimum of \$0.2 million of Exploration Expenditures in any six-month period; and

- a pre-feasibility study, prepared in accordance with NI 43-101 and CIM standards, for a mineral resource of not less than 300,000 ounces of gold equivalent.

Upon Patagonia completing the Earn-In Obligations, Patagonia and the Vendors will hold 75% and 25%, respectively, in a joint venture company holding the Homenaje Property. If either party's equity interest is diluted below 10%, it will convert to a 2% NSR royalty.

Pursuant to the terms of the Transfer Agreement, Patagonia has acquired the Vendors' interest in the Nico Property in exchange for a 1.5% NSR royalty. If, by the end of third-year, the Nico Property has not been operated as a producing mine, or Patagonia has not produced and shipped minerals in commercial quantities (excluding bulk sampling or pilot plant operations, if any) from the Nico Property for a period of 30 consecutive days, Mirasol will have the right to regain full ownership of the Nico Property at no cost.

No exploration activities were undertaken at Homenaje as of December 31, 2021, although environmental permitting commenced.

Mina Angela Property

On August 13, 2019, the Company announced an offer letter agreement with Latin Metals Inc. to acquire its Mina Angela Property. The Mina Angela Property is situated in the Somuncura Massif of southern Argentina and is comprised of 44 individual claims located approximately 50 kilometers east-southeast of Patagonia's 100% owned Calcatreu property. Pan American Silver's Navidad silver and base metal deposit is located 45 kilometers further to the south-southeast of Mina Angela. In March 2020, Patagonia extended the period by which it must enter into the definitive agreement with a \$100,000 payment to Latin Metals; \$50,000 of which was applied to extend the period to enter into the definitive agreement and \$50,000 of which was a partial prepayment of the first earn-in payment to be made under the definitive agreement.

On September 15, 2020, the Company entered into a definitive option agreement with Latin Metals Inc., which granted the Company an irrevocable option to acquire a 100% interest in the Mina Angela property. Upon signing of the definitive agreement, the Company paid \$200,000 representing the balance of the first earn-in payment. It is expected that the Company will pay the second earn-in payment of \$250,000 within the next six months if it exercises the option to acquire the Mina Angela Property. A further and final payment of \$500,000 is expected to be paid within 30 days of verification that the legal restrictions preventing development of mining activity in the Chubut Province and at the Mina Angela Property have been lifted in such a manner that the Company thereafter has the ability to perform exploration and exploitation mining activities on the Mina Angela Property. In addition, Latin Metals will be entitled to receive a 1.25% Net Smelter Royalty from future productions, half of which can be repurchased by the Company for \$1 million.

On March 12, 2021, the Company exercised the option to acquire 100% interest in the Mina Angela Property and paid the second earn-in payment of \$250,000.

On December 15, 2021, the legislature of the Province of Chubut passed a bill to amend the provincial mining law to enable open pit mining within a given area that comprises the Gastre and Telsen Departments. This new law regarding mining zoning was subsequently promulgated on December 16, 2021 by the Chubut Governor. This newly approved law regarding mining zoning would have enabled the Company to advance the development of 101,151 ha of its mining concessions, including Mina Angela. However, on December 20, 2021, the Chubut Governor, sent a bill to the legislature of the Province of Chubut to retract the recent amendments as a result of the violent demonstrations that occurred soon after such law was enacted. This

bill, which revoked the amendments regarding mining zoning, was passed by the legislature of the Province of Chubut on December 21, 2021.

La Manchuria Property

The La Manchuria Property is located approximately 46 kilometers to the southeast of Cap-Oeste.

In addition to its current mineral resources, the Company's La Manchuria Property is believed to be prospective for the discovery of new gold and silver mineralization. Exploration work continued with mapping and rock chip sampling over an area of approximately 2,000 hectares ("ha"). Veinlets and narrow breccia zones, indicative of hydrothermal activity, were found at the Magali zone. Anomalous gold values were reported from the Cecilia zone. As a result of these favorable results, a new drill program for La Manchuria, of 2,000m in 14 holes is planned to test geophysical anomalies and to test gold anomalies generated from surface rock chip sampling. An updated NI 43-101 technical report for this property was completed on September 27, 2019 by Micon International and is on file at www.sedar.com.

No exploration activities were undertaken at La Manchuria during the year ended December 31, 2021.

Sarita Property

The Sarita Property, located in the province of Santa Cruz, is situated in the SW part of the Deseado Massif approximately 10 kilometers northwest of the Company's Martha mine and mill. Sarita hosts a widespread system of banded, low sulfidation Au-Ag veins, encompassing a small rhyolitic dome complex. Geologically, the area displays similar structural and stratigraphic characteristics to the Company's Martha Property with Ag-rich, polymetallic, vein-hosted, intermediate sulfidation mineralization. The banded, silver- and gold-bearing quartz veins and quartz vein breccias occur within a set of NNW-SSE striking normal faults and constitute an extensive mineralized vein system, with more than 12 kilometers in total length. Precious and base metal mineralization has been recognized in quartz veins and vein breccias up to 3 meters wide at surface, composed of quartz and sulfides. Rock chips from discrete vein structures or aligned float have returned anomalous gold samples ranging from 0.1 to 83.4 g/t Au and from 100 to 15,444 g/t Ag, in separate samples. To date, 16 diamond drill holes have been drilled for a total of 1,754 m targeting the vein mineralization. Geochemical results from drilling show gold and silver anomalies. Due to poor ground conditions encountered during drilling, core recovery in some of the veins was poor and Au and Ag mineralization may have not been recovered. Other exploration activities at Sarita included geophysical surveys and drilling. Geophysical anomalies were identified by IP/Res lines (7.1-line kilometers) and by detailed ground magnetics (220 hectares) over different targets areas.

During May 2019, a total of 82 RAB holes completing 1,818.4 m, were drilled in the area yielding a total of 1,257 samples for geochemical analysis. In September and October 2019, a second phase of drilling was undertaken, for a total of 2,409 m in 116 holes and 1,361 samples assayed. The RAB drilling defined several shallow, NW-oriented zones of vein-hosted mineralization; notably Veta Maria and Virginia. The Company has plans to follow-up the RAB results with core drilling.

No exploration activities were undertaken at Sarita during the year ended December 31, 2021.

La Josefina Property

La Josefina is situated about 450 kilometers northwest of the city of Rio Gallegos, in the Santa Cruz province of Argentina within a scarcely populated steppe-like region known as Patagonia. The La Josefina Property occupies 52,800 hectares and makes up approximately 90% of all meters drilled by the Company. The La Josefina Property consists of mineral rights composed by an area of 528 square kilometers established in 1994 as a mineral reserve held by Fomicruz. The La Josefina Property comprises 16 Manifestations of Discovery totaling 52,767 hectares which are partially covered by 399 tenements.

In March 2007, the Company (via a subsidiary of Hunt) acquired the exploration and development rights to La Josefina from Fomento Minero de Santa Cruz Sociedad del Estado (“Fomicruz”). In July 2007, the Company entered into an agreement (subsequently amended) with Fomicruz which provides that, in the event that a positive feasibility study is completed on the La Josefina property, a Joint Venture Corporation (“JV Corporation”) would be formed by the Company and Fomicruz. The Company would own 81% of the joint venture company and Fomicruz would own the remaining 19%. Fomicruz has the option to earn up to a 49% participating interest in the JV Corporation by reimbursing the Company an equivalent amount, up to 49%, of the exploration investment made by the Company. The Company has the right to buy back any increase in Fomicruz’s ownership interest in the JV Corporation at a purchase price of \$200 thousand per each percentage interest owned by Fomicruz down to its initial ownership interest of 19%. The Company can also purchase 10% of the Fomicruz’s initial 19% JV Corporation ownership interest by negotiating a purchase price with Fomicruz. Under the agreement, the Company had until the end of 2019 to complete cumulative exploration expenditures of \$18 million and determine if it will enter into production on the property. In October 2019, the agreement was extended until April 30, 2021 which period may be extended for an additional one-year term. At December 31, 2019, the Company had incurred approximately \$20 million and is currently in discussions with Fomicruz to develop a plan for production. An NI 43-101 compliant technical report on La Josefina, dated September 29, 2010 and prepared by UAKO Geological Consulting, is on file on www.sedar.com.

During 2020, a total of 1,098-line kilometers of ground geophysics and sampling were surveyed covering the Flaca, Cecilia, Amanda, Pequeña and Cruzada veins. In addition, a total of 124 rock chip samples have been taken.

The 2007 agreement was terminated by mutual consent of the Company and Fomicruz in July 2020 and the Company has renegotiated with Fomicruz new terms and conditions for the exploration and exploitation of the La Josefina and La Valenciana properties and in December 2021, both parties entered into a new exploration agreement with an exploitation option for the following three properties: La Josefina, La Valenciana and, a new and unexplored property, Abril.

The Company also entered into a net smelter returns royalty agreement, pursuant to which Fomicruz is granted a 2% royalty on the properties that it has already contributed to PGSA and on the Abril Property, with the exception of La Josefina and La Valenciana, where Fomicruz is granted a 5% royalty. Furthermore, the Company committed to a \$5 million investment to developing an exploration program for the properties during a 2-year period beginning once the environmental permits for the exploration development of the properties are obtained. As of the date of the date of this Annual Report on Form 20-F, the environmental permits are pending approval.

No exploration activities were undertaken at La Josefina during the year ended December 31, 2021.

La Valenciana Property

La Valenciana is located in the central-north portion of the Santa Cruz Province, Argentina. The property encompasses an area of approximately 29,600 hectares and is contiguous to the Company's La Josefina property to the east. The La Valenciana Property is comprised of 11 Manifestations of Discovery (MDs) covering segments of Estancia Cañadón Grande, Estancia Flecha Negra, Estancia Las Vallas, Estancia La Florentina, Estancia La Valenciana and Estancia La Modesta (inactive ranches). In La Valenciana, exploration has been limited, with more than half of the surface without systematic exploration. Fomicruz carried out preliminary works defining a main vein system of low sulfidation epithermal style, with gold and silver values with base metals. Exploration and subsequent reconnaissance sampling by CCSA added other secondary targets and structures combining a total of 5.70 kilometers mapped veins and stockworks. The limited exploration to date, alteration features and associated structures, and partial coverage by probable post-mineral units suggests that there is still a high degree of discovery potential in the mining block. A new exploration program to define mineralization includes geophysical surveys and shallow drilling in new and known target areas and an intensive prospecting and reconnaissance sampling over the Company's entire land position, is being considered. Mineral resources have not yet been defined on the La Valenciana Property.

The 2007 agreement was terminated by mutual consent of the Company and Fomicruz in July 2020 and the Company has renegotiated with Fomicruz new terms and conditions for the exploration and exploitation of the La Josefina and La Valenciana properties through a private initiative filed by Patagonia Gold SA, and in December 2021 both parties entered into a new exploration agreement with an exploitation option for the following three properties: La Josefina, La Valenciana and a new and unexplored property, Abril.

The Company also entered into a net smelter returns royalty agreement, pursuant to which Fomicruz is granted a 2% royalty on the properties that it has already contributed to PGSA and on the Abril Property, with the exception of La Josefina and La Valenciana, Fomicruz is granted a 5% royalty. Furthermore, the Company committed to a \$5 million investment to developing an exploration program for the properties during a 2-year period beginning once the environmental permits for the exploration development of the properties are obtained. As of the date of the date of this Annual Report on Form 20-F, the environmental permits are pending approval.

No exploration activities were undertaken at La Valenciana during the year ended December 31, 2021.

Abril Property

The Abril property is an approximately 2,000-hectare block that border the Company's Martha mine on the south. This property is also a part of the private initiative proposed by Patagonia Gold to Santa Cruz government and therefore Abril is included in the new exploration agreement with an exploitation option entered into by Patagonia Gold and Fomicruz for the properties in December 6, 2021. Approximately 386.3 linear kilometers of ground magnetics have been surveyed in the area covering it completely with 50 m N-S lines and several kilometers of epithermal veins have been mapped. Sawn channel samples are planned to be cut as soon as the environmental permits are approved.

Bajo Pobre Property

The Bajo Pobre property covers 3,190 hectares and is mainly on the Estancia Bajo Pobre. The property is located 90 kilometers south of the town of Las Heras. No exploration activity occurred on the Bajo Pobre Property in 2021 and no exploration activity is planned for the immediate future.

El Gateado Property

In March 2006, CCSA acquired the right to conduct exploration on the El Gateado Property through a claim staking process for a period of at least 1,000 days, commencing after the Government issues a formal claim notice, and retain 100% ownership of any mineral deposit found within. El Gateado is a 10,000-hectare exploration concession filed with the Santa Cruz Provincial mining authority. The property is located in the north-central part of Santa Cruz province, contiguous to La Josefina on the east.

The Company has not yet received a formal claim notice pertaining to the El Gateado Property. Should a mineral deposit be discovered, the Company has the exclusive option to file for mining rights on the property. The surface rights of the El Gateado claim are held by the following Ranches, Estancia Los Ventisqueros, Estancia La Primavera, Estancia La Virginia and Estancia Piedra Labrada. The El Gateado claims are filed with the government under file #406.776/DPS/06.

No recent exploration activity has taken place on El Gateado Property and no exploration activity is planned for the immediate future.

Las Mellizas Property (La Esperanza Block)

The Company acquired Newmont's interest in the Las Mellizas Property and La Esperanza Block in early 2019 in exchange for a 1.5% net smelter return royalty, which grants the Company a 100% undivided right and interest in these properties. This 30,000-hectare area is located north and west of La Valenciana in the central part of the Deseado Massif, in the Santa Cruz Province, Argentina. These early exploration properties have been granted environmental exploration permits and landowners access agreements have been negotiated, allowing the development of the exploration plan which consist of conducting a new interpretation of the data provided by the former owners. Trenches and drill holes have been carried out in this epithermal vein field. Results from surface sampling are very encouraging and several structures have never been tested or mapped.

Tornado – Huracán Property

The Tornado and Huracán (“Tornado”) properties are located approximately 85 kilometers southeast from the town of Perito Moreno and 250 kilometers west of the city of Pico Truncado, the main population center that serve the oil industry in the region. Tornado is located in a prospective area in the northwestern portion of the Deseado Massif. The area lies within cluster of epithermal low sulfidation volcanic hosted gold and silver deposits, including the San Jose (Hochschild-McEwen) and the Cerro Negro (Newmont-Goldcorp) mines to the northwest and southeast of Tornado, respectively.

A total of 3,600 m of RC drilling was planned for mid-2021 at the Tornado and Huracán (“Tornado”) properties. The RC drill program commenced at Tornado but due to adverse winter condition and poor rock conditions encountered during drilling, the campaign was put on hold until later in the year. Only one hole was drilled in the Guanaco target (276 m, NSR) in early December and a diamond rig was available to start drilling the rest of the plan. The first 392 m hole was complete in the El Camino Target in late December. An oxidized, hydrothermal breccia was intersected in the first hole. During January and February 2022, a total of 2,845 m of drilling in six (6) holes were completed and assays are pending.

Item 4A. Unresolved Staff Comments

Not applicable.

Item 5. Operating and Financial Review and Prospects

The following discussion should be read in conjunction with the Company's Form 20-F filed with the Commission on May 5, 2021 for the fiscal year ended December 31, 2020 which includes a discussion of the financial statements for the years ended December 31, 2020, 2019, and 2018.

A. Operating Results

The following discussion should be read in conjunction with the Audited Consolidated Financial Statements for the fiscal years ended December 31, 2021 and 2020 and notes thereto included under Item 18. Except where otherwise noted, financial results are rounded to the nearest \$1,000 and are expressed in United States dollars.

Summary of Consolidated Results of Operations for the year ended December 31, 2021 and 2020 (\$'000)

(in \$000's, except ounces and per share amounts)	Year ended December 31,			
	2021	2020	Change	%Change
Operational results				
Total gold equivalent ounces – produced ⁽¹⁾	9,336	10,233	(897)	(9%)

- (1) Gold equivalent ounces include silver ounces produced and sold converted to a gold equivalent based on a ratio of the average spot market price for the commodities each period. The ratio for year ended December 31, 2020 was 85.99:1 (2019 – 85.29:1).

Year ended December 31, 2021 and 2020 (\$'000)

Total production decreased during the year ended December 31, 2021 as the Company had residual heap leach operations at Lomada de Leiva (“Lomada”) and Cap-Oeste since February 2019, which has been declining due to the depletion in the pads from ongoing leaching. In November 2020 the Company restarted the mining operation at Lomada and started placing new material on the leach pad. The production from Lomada following the restart of operations has not offset the declining production at Cap-Oeste and thus the overall production has decreased quarter over quarter. Production was also lower as the Company has not produced concentrate from Mina Martha since April 2020.

The Company earned total revenue of \$18,104 during the year ended December 31, 2021 compared to \$19,849 during the same period in 2020. Revenue decreased due to decrease in gold equivalent ounces produced and sold during the period compared to the same period in 2020. Gold prices remained consistent during the year ended December 31, 2021 compared to the same period in 2020.

Cost of sales were \$13,559 during the year ended December 31, 2021 compared to \$13,247 during the same period in 2020. During the year ended December 31, 2021, the net realizable value of the inventory was less than the costs incurred in establishing the gold held on carbon and the Company recorded an inventory write down of \$1,103 (2020 - \$Nil) under cost of sales. The increase in cost of sales was partially offset by the decrease in gold equivalent ounces sold during the year ended December 31, 2021 compared to the same period in 2020.

The Company incurred exploration expenses of \$4,604 during the year ended December 31, 2021 compared to \$2,303 during the same period in 2020. The increase in exploration expenses was due to the Company’s increased exploration program for 2021 in Monte Leon and Tornado and Huracan.

The Company incurred repair and maintenance expense of \$658 during the year ended December 31, 2021 compared to \$Nil during the same period in 2020. The repair and maintenance expense during the period related to maintenance work at the Mina Martha plant.

The Company incurred administrative expenses of \$6,427 during the year ended December 31, 2021 compared to \$5,611 during the same period in 2020. The increase in administrative expenses was due to the increase in Argentine statutory taxes related to the interest paid overseas to Patagonia Gold Limited and increase in depreciation of mineral properties, which was partially offset by the decrease in professional fees.

The Company recorded an impairment charge of \$1,489 during the year ended December 31, 2021 compared to \$Nil during the same period in 2020. The impairment charge was \$989 for the Lomada property as the total estimated discounted future pre-tax cash flows are less than the carrying amount of the asset and \$500 for Mina Angela property due to the legal restrictions preventing development of mining activity in the Chubut. See note 7 of the financial statements for more information.

The Company recorded a write-down of \$2,323 during the year ended December 31, 2021 compared to \$Nil during the same period in 2020. The write-down was related to the recoverable costs from Fomicruz included in other receivables on the statement of financial position. See note 13 of the financial statements for more information.

The Company incurred interest expense of \$1,436 during the year ended December 31, 2021 compared to \$2,100 during the same period in 2020. The decrease in interest expense was due to debt settled by issuing shares in October 2020.

Net loss for the year ended December 31, 2021 was \$11,266 compared to \$4,381 during the same period in 2020. Net loss increased due to decrease in revenues, increase in exploration and administrative expenses, the write-down of other receivables, the impairment of mineral properties and decrease in other income during the current period compared to the same prior period. Other income consists of gain on disposition of securities. See note 22 of the financial statements for more information. The increase in net loss was partially offset by income tax benefit.

Cash flows for the year ended December 31, 2021 and 2020 (\$'000's)

The Company used \$591 of cash in operating activities for the year ended December 31, 2021 compared to cash generated of \$58 during the same period in 2020. The decrease in cash generated from operating activities during 2021 was primarily due to lower revenues during 2021.

Cash used in investing activities for the year ended December 31, 2021 was \$3,888 compared to \$1,501 for the same period in 2020. The increase in cash used in investing activities was a result of higher additions to the mineral properties as the Company restarted mining operations at Lomada in November 2020, following receipt of a preliminary permit on October 7, 2020. Mining operations at Lomada had been closed since February 2019. The costs related to the development of the new pit were capitalized as mineral properties.

Cash generated from financing activities for the year ended December 31, 2021 was \$3,867 compared to \$509 during the same period in 2020. The increase in cash generated from financing activities was primarily due to the private placement completed in March 2021.

Financial Position (US \$'000)

Cash

The Company has cash on hand of \$291 as of December 31, 2021 compared to \$819 as of December 31, 2020.

Receivables

Current receivables are \$2,512 as of December 31, 2021 compared to \$2,041 as of December 31, 2020. The increase in current receivables is a result of the increase in VAT recoverable during the year ended December 31, 2021.

Non-current receivables are \$1,421 as of December 31, 2021 compared to \$3,544 as of December 31, 2020. The decrease in non-current receivables is a result of the write-down of recoverable costs which was partially offset by the increase in VAT recoverable during the year ended December 31, 2021, which is not expected to be collected within the next twelve months.

Inventories

The Company has inventories of \$3,759 as of December 31, 2021 compared to \$3,289 as of December 31, 2020. The increase in inventories was mainly due to higher materials and supplies and gold held on carbon as at December 31, 2021. During the year ended December 31, 2021, the net realizable value of the inventory was less than the costs incurred in establishing the gold held on carbon and the Company recorded an inventory write down of \$1,103.

Property, plant and equipment (“PPE”)

The Company has PPE of \$12,475 as of December 31, 2021 compared to \$13,233 as of December 31, 2020. The decrease in PPE was a result of the depreciation charge which was partially offset by capital additions.

Bank indebtedness

The Company has bank indebtedness of \$6,706 as of December 31, 2021 compared to \$9,636 as of December 31, 2020. The decrease in bank indebtedness was a result paying down the existing lines of credit using the funds raised from the March 2021 private placement.

Accounts payable and accrued liabilities

The Company has accounts payable and accrued liabilities of \$6,859 as of December 31, 2021 compared to \$4,384 as of December 31, 2020. The increase in accounts payable and accrued liabilities was a result of the restart of mining operations at Lomada.

Accounts payable with related parties

The Company has accounts payable with related parties of \$208 as of December 31, 2021 compared to \$144 as of December 31, 2020. The increase in accounts payable with related parties is a result of remuneration, fees and interest expenses incurred during the period.

Loan payable and current portion of long-term debt

The Company has loan payable and current portion of long-term debt of \$517 as of December 31, 2021 compared to \$363 as of December 31, 2020. The increase in loan payable and current portion of long-term debt is due to financing acquired in 2021 to purchase drilling equipment.

Long term debt

The Company has non-current portion of total long-term debt of \$15,762 as of December 31, 2021 compared to \$14,917 as of December 31, 2020. This includes \$15,507 payable to related parties as of December 31, 2021 compared to \$14,808 as of December 31, 2020.

In February 2019, the Company announced that Cantomi Uruguay S.A., a company owned and controlled by the Company’s Non-Executive Chairman, Carlos J. Miguens, had provided a two-year \$15,000 loan facility that will be utilized to fund the Company’s activities going forward, while the review of the Cap-Oeste underground option is ongoing together with the pre-feasibility Study of its flagship Calcatreu Property. On November 16, 2020, the maturity of the loan was extended to December 31, 2022 and on December 22, 2021, the maturity of the loan was further extended to December 31, 2023. All other terms of the loan remain unchanged. As of December 31, 2021, there was \$15,507 of principal and interest owing under this loan facility compared to \$14,808 as of December 31, 2020.

As of February 2021, Cantomi Uruguay S.A. is no longer a related party as Carlos Miguens no longer has control of, or significant influence over the company.

Summary of Segmented Results of Operations (\$000's)

Cap-Oeste

Cap-Oeste produced a total of 6,979 gold equivalent ounces (4,205 ounces of gold and 198,989 ounces of silver) during the year ended December 31, 2021 compared to 6,965 gold equivalent ounces (5,081 ounces of gold and 161,314 ounces of silver) during the same period in 2020.

The cash costs of production for year ended December 31, 2021 was \$698 per ounce¹ and \$732 per ounce¹ including depreciation and amortization compared to \$634 per ounce¹ and \$687 per ounce¹ during the same period in 2020. The increase in cash cost of production per ounce was due to the higher inflation in Argentina which was partially offset by the devaluation of the Argentinian peso.

A total of 7,687 gold equivalent ounces (4,749 ounces of gold and 215,020 ounces of silver) were sold during the year ended December 31, 2021 at an average gross price of \$1,812 per ounce¹. During the same period in 2020, a total of 7,036 gold equivalent ounces (5,165 ounces of gold and 162,832 ounces of silver) were sold at an average gross price of \$1,765 per ounce¹.

Cap-Oeste generated revenues of \$13,927 during the year ended December 31, 2021 compared to \$12,417 during the same period in 2020. The increase in revenues was due to the higher gold prices and higher gold equivalent ounces sold during the year ended December 31, 2021 compared to the same period in 2020.

Cost of sales were \$7,137 during the year ended December 31, 2021 compared to \$6,589 during the same period in 2020. The increase in cost of sales was inline with the higher gold equivalent ounces sold during the year ended December 31, 2021 compared to the same period in 2020.

Administration expenses of \$464 were incurred during the year ended December 31, 2021 compared to \$495 during the same period in 2020. Administrative expenses consisted of depreciation of the mineral properties.

Lomada de Leiva Mine ("Lomada")

Lomada produced a total of 2,357 ounces of gold during the year ended December 31, 2021 compared to 2,912 ounces of gold during the same period in 2020. Production decreased as the Company had residual heap leach operations at Lomada since February 2019, which has been declining due to the depletion in the pads from ongoing leaching. Following receipt of a preliminary permit on October 7, 2020, in November 2020 the Company restarted the mining operation at Lomada which had been previously closed since in February 2019 and started placing new material on the leach pad. The production from Lomada following the restart of operations has not offset the declining production and thus the overall production has decreased quarter over quarter.

The cash costs of production for the year ended December 31, 2021 were \$2,669 per ounce¹ and \$2,797 per ounce¹ including depreciation and amortization compared to \$714 per ounce¹ and \$823 per ounce¹ during the same period in 2020. The increase in cash costs is due to the decrease in production and the increase in costs due to the restart of mining operations.

¹ See Non-IFRS Financial Performance Measures

A total of 2,320 gold equivalent ounces were sold during the year ended December 31, 2021 at an average gross price of \$1,800 per ounce¹. During the same period in 2020, 3,782 gold equivalent ounces were sold at an average gross price of \$1,718 per ounce¹.

Lomada generated revenues of \$4,177 during the year ended December 31, 2021 compared to \$6,482 during the same period in 2020. The decrease in revenue was due to lower amounts of gold equivalent ounces sold.

Cost of sales were \$6,422 during the year ended December 31, 2021 compared to \$4,391 during the same period in 2020. The increase in cost of sales was due to the increase in costs due to the restart of mining operations. During the year ended December 31, 2021, the net realizable value of the inventory was less than the costs incurred in establishing the gold held on carbon and the Company recorded an inventory write down of \$1,103 (2020 - \$Nil) under cost of sales.

Administrative expenses of \$808 were incurred during the year ended December 31, 2021 compared to \$Nil during the same period in 2020. Administrative expenses consisted of depreciation of the mineral properties.

The Company recorded an impairment charge of \$989 during the year ended December 31, 2021 as the total estimated undiscounted future pre-tax cash flows are less than the carrying amount of the asset.

Martha and La Josefina Properties

There was no production at Martha during the year ended December 31, 2021 as the Company did not produce concentrate from Martha after April 2020. During the year ended December 31, 2020, Martha produced a total of 356 gold equivalent ounces (49 ounces of gold and 29,838 ounces of silver). Operations at Martha remain on care and maintenance while the Company continues to explore the property.

The cash costs of production for the year ended December 31, 2020 were \$1,421 per ounce¹ and \$1,601 per ounce¹ including depreciation and amortization.

Martha generated revenues of \$Nil during the year ended December 31, 2021 compared to \$950 during the same period in 2020.

Cost of sales were \$Nil during the year ended December 31, 2021 compared to \$2,267 during the same period in 2020.

Exploration expenses of \$91 were incurred during the year ended December 31, 2021 compared to \$83 during the same period in 2020.

The Company incurred repair and maintenance expense of \$658 during the year ended December 31, 2021 compared to \$Nil during the same period in 2020. The repair and maintenance during the period related to maintenance work at the Mina Martha plant.

Calcatreu Property

Exploration expenses of \$1,576 were incurred during the year ended December 31, 2021 compared to \$884 during the same period in 2020. The increase in exploration expenses was due to work on the Baseline Study and continued field work, which includes drilling, surface exploration, geophysics and hydrologic studies.

¹ See Non-IFRS Financial Performance Measures

Administration expenses of \$359 were incurred during the year ended December 31, 2021 compared to \$217 during the same period in 2020. The increase in administrative expenses was due to increase in Argentine statutory taxes.

Argentina, Uruguay and Chile

This segment includes the results from the Company's work on the Monte Leon and Tornado and Huracán properties in Argentina, the San José Property in Uruguay and general corporate activities. This segment does not generate revenues and includes costs that are not directly related to other mining properties that are reported as separate segments.

Exploration expenses of \$2,937 were incurred during the year ended December 31, 2021 compared to \$1,336 during the same period in 2020. Exploration expenses increased due to the drilling program conducted at Monte Leon and Tornado y Huracán and geological mapping and sampling included in this segment.

Administration expenses of \$3,143 were incurred during the year ended December 31, 2021 compared to \$2,946 during the same period in 2020. The increase in administrative expenses was mainly due to the increase in Argentine statutory taxes related to the interest paid overseas to Patagonia Gold Limited.

Interest expense of \$652 was incurred during the year ended December 31, 2021 compared to \$318 during the same period in 2020. The increase in interest expense was due to the increase in bank indebtedness with Argentinian banks.

A write-down of other receivables of \$2,323 was incurred during the year ended December 31, 2021 compared to \$Nil during the same period in 2020. The write-down was related to the recoverable costs from Fomicruz included in other receivables on the statement of financial position. See note 13 of the financial statements for more information.

United Kingdom

This segment includes the results of Patagonia Gold Limited ("PGL") (formerly Patagonia Gold PLC) which is a holding company and does not generate any revenues.

Administration expenses of \$185 were incurred during the year ended December 31, 2021 compared to \$212 during the same period in 2020. Administrative expenses decreased due to lower professional fees.

Interest expense of \$461 was incurred during the year ended December 31, 2021 compared to \$610 during the same period in 2020. The decrease in interest expense was due to the repayment of bank indebtedness.

North America

This segment includes the results of Patagonia Gold Corp ("PGC"), Patagonia Gold Canada Inc and 1272680 B.C. Ltd ("BC") (formerly 1494716 Alberta Ltd.).

These entities are holding companies and do not generate any revenues. PGC and BC were acquired as part of the reverse acquisition during 2019 and their results of operations prior to the reverse acquisition are not incorporated in the financial statements.

Administration expenses of \$930 were incurred during the year ended December 31, 2021 compared to \$1,285 during the same period in 2020. The decrease in administration expenses was primarily due to lower accounting and legal fees during the period.

Interest expense of \$311 was incurred during the year ended December 31, 2021 compared to \$1,171 during the same period in 2020. The decrease in interest expense was a result of the Company repaying its debts.

Currency Risk

Currency risk is the risk to the Company's earnings that arises from fluctuations of foreign exchange rates and the degree of volatility of these rates. The Company does not use derivative instruments to reduce its exposure to foreign currency risk.

As at December 31, 2021, the Company had financial assets and liabilities denominated in the following currencies:

	CAD	AR\$	USD	Euro	GBP
Cash	\$ 107	\$ 130	54	\$ -	-
Other working capital (deficit) items - net	(140)	(5,218)	(8,080)	(207)	19
Non-current financial assets	-	401	-	-	15
Non-current financial liabilities	-	-	(15,762)	-	-

Off-Balance Sheet Arrangements

As of December 31, 2021, the Company had no material off-balance sheet arrangements such as guarantee contracts, contingent interest in assets transferred to an entity, derivative instruments obligations or any obligations that trigger financing, liquidity, market or credit risk to us.

Commitments and Contingencies

Republic Metals Corporation (“Republic”) filed for protection under Chapter 11 of the United States Bankruptcy Code on November 2, 2018 (the “Petition Date”) in the United States Bankruptcy Court for the Southern District of New York. Republic processed material from the Company’s Lomada and Cap-Oeste projects in the Santa Cruz province of Argentina prior to the Petition Date. The Chapter 11 plan of liquidation in the bankruptcy proceedings appointed a Litigation Trustee (the “Trustee”) to handle the Bankruptcy Estate of Republic. The Company received a demand letter (the “Demand Letter”) from the Trustee dated March 17, 2020, demanding repayment of amounts previously paid by Republic to the Company within 90 days before the Petition Date. The Company reviewed the Demand Letter with its independent US counsel and counsel has responded to the Demand Letter. Republic was required to have commenced an action to recover the Preference Amount by November 2, 2020. As of the date of this Annual Report, no litigation has been brought by Republic against the Company. No provision has been accrued in these consolidated financial statements related to the Demand Letter as Management does not anticipate that the Company will have to repay any of the amounts previously received from Republic.

Non-IFRS Financial Performance Measures

Non-IFRS financial measures are intended to provide additional information only and do not have any standard meaning prescribed by generally accepted accounting principles. Unless otherwise noted, we present the Non-IFRS financial measures of our continuing operations in the tables below.

Cash Costs

The Company uses cash costs to evaluate the Company's current operating performance. We believe these measures assist in understanding the costs associated with producing gold and silver, assessing our operating performance and ability to generate free cash flow from operations and sustaining production. These measures may not be indicative of operating profit or cash flow from operations as determined under IFRS. The Company believes that allocating cash costs to gold and silver lead based on gold and silver metal sales relative to total metal sales best allows the Company and other stakeholders to evaluate the operating performance of the Company.

Year ended December 31, 2021 (in \$'000, except ounces and per unit amounts)

	Martha and La					
	Josefina	Cap-Oeste	Lomada de Leiva			
Cost of sales	\$	-	\$	7,137	\$	6,422
Less: Inventory write down		-		-		(1,103)
Less: Depreciation		-		(917)		(978)
Add/(Less): Other charges and timing differences ⁽¹⁾		-		(1,349)		1,950
Cash costs	\$	-	\$	4,871	\$	6,291
Add: Depreciation ⁽²⁾		-		237		302
Cash costs and depreciation	\$	-	\$	5,108	\$	6,593
Ounces produced		-		6,979		2,357
Cash costs per ounce	\$	-	\$	698	\$	2,669
Cash costs and depreciation per ounce	\$	-	\$	732	\$	2,797

(1) These costs include expenses such as royalties, export and refinery costs, and other charges that the Company does not include in cash costs. In addition, these amounts include timing differences related to accrual basis of accounting that the Company excludes from the non-IFRS measure in order to measure the cash costs.

(2) Depreciation is related to the plant, machinery, equipment and vehicles.

Year ended December 31, 2020 (in \$'000, except ounces and per unit amounts)

	Martha and La					
	Josefina	Cap-Oeste	Lomada de Leiva			
Cost of sales	\$	2,267	\$	6,589	\$	4,391
Less: Depreciation		(346)		(1,106)		(1,143)
Add/(Less): Other charges and timing differences ⁽¹⁾		(1,415)		(1,067)		(1,169)
Cash costs	\$	506	\$	4,416	\$	2,079

(1) These costs include expenses such as royalties, export and refinery costs, and other charges that the Company does not include in cash costs. In addition, these amounts include timing differences related to accrual basis of accounting that the Company excludes from the non-IFRS measure in order to measure the cash costs.

(2) Depreciation is related to the plant, machinery, equipment and vehicles.

Average gross price per ounce sold

Average gross price per ounce sold is calculated by dividing the revenue for the relevant year by the ounces sold.

Year ended December 31, 2021 (in \$'000, except ounces and per unit amounts)

	Cap-Oeste	Lomada de Leiva
Revenue	\$ 13,927	\$ 4,177
Ounces sold	7,687	2,320
Average gross price per ounce sold	\$ 1,812	\$ 1,800

Year ended December 31, 2020 (in \$'000, except ounces and per unit amounts)

	Cap-Oeste	Lomada de Leiva
Revenue	\$ 12,417	\$ 6,482
Ounces sold	7,036	3,773
Average gross price per ounce sold	\$ 1,765	\$ 1,718

B. Liquidity and Capital Resources

Except where otherwise noted, the amounts disclosed in this section are rounded to the nearest \$1,000 and are expressed in United States dollars.

As of December 31, 2021, the Company had a working capital deficiency of \$7,728 (2020 - \$8,378). The improvement in the working capital deficiency is a result of the repayment of bank indebtedness and the settlement of debts with related parties.

The Company's capital management objectives are:

- to ensure the Company's ability to continue as a going concern;
- to fund projects from raising capital from equity placements rather than long-term borrowings;
- to increase the value of the assets of the business; and
- to provide an adequate return to shareholders in the future when new or existing exploration assets are taken into production.

These objectives will be achieved by maintaining and adding value to existing extraction projects and identifying new exploration projects, adding value to these projects and ultimately taking them through to production and cash flow, either with partners or by the Company's means.

The Company sets the amount of capital in proportion to its overall financing structure (i.e. equity and financial liabilities). The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

In February 2019, the Company announced that Cantomi Uruguay S.A., a company owned and controlled by the Company's Non-Executive Chairman, Carlos J. Miguens, had provided a two-year \$15,000 loan facility that will be utilized to fund the Company's activities going forward, while the review of the Cap-Oeste underground option is ongoing together with the pre-feasibility Study of its flagship Calcatreu Property. On November 16, 2020, the maturity of the loan was extended to December 31, 2022. All other

terms of the loan remain unchanged. As of December 31, 2021, there is \$15,507 (2020 - \$14,808) of principal and interest owing under the loan facility.

As of February 2021, Cantomi Uruguay S.A. is no longer a related party as Carlos Miguens no longer has control of the company.

The Company also has access to the following operating lines of credit:

- A credit facility with a limit of \$6,600, maturity date of December 31, 2022 and interest rate of 1.5% plus base rate. As at December 31, 2021, the interest rate was 1.65% and the Company owed \$3,915 (2020 - \$9,636) under the credit facility.
- A credit facility with an Argentinian bank with a limit of \$1,947 (200,000 Argentinian Peso), maturity date of April 30, 2022 and interest rate of 42%. As at December 31, 2021, the Company owed \$1,941 (2020 - \$Nil) under the credit facility.
- A credit facility with an Argentinian bank with a limit of \$1,460 (150,000 Argentinian Peso), maturity date of June 30, 2022 and interest rate of 35%. As at December 31, 2021, the Company owed \$850 (2020 - \$Nil) under the credit facility.

On March 10, 2021, the Company completed a private placement offering and raised gross proceeds of \$7.4 million (CAD \$9.3 million) through the issuance of 104,086,063 units of the Company at a price of CAD \$0.09 per unit.

The contractual obligations of the Company's liabilities as at December 31, 2021 are as follows:

	Payments Due by Period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Bank indebtedness	\$6,706	\$6,706	-	-	-
Accounts payable and accrued liabilities	6,859	6,859	-	-	-
Accounts payable with related parties	208	208	-	-	-
Loan payable and current portion of long-term debt	517	517	-	-	-
Long-term debt	255	-	255	-	-
Long-term debt with related parties	15,507	-	15,507	-	-
Reclamation and remediation obligations	6,188	-	5,142	-	1,046
Other long-term payables	8	-	8	-	-
Total	\$36,248	\$14,290	\$20,912	-	\$1,046

C. Research and Development, Patents and Licenses, etc.

We do not currently, and did not previously, have research and development policies in place.

D. Trend Information

Other than as disclosed in this Annual Report, we are not aware of any trends, uncertainties, demands, commitments or events which are reasonably likely to have a material effect upon our net sales or revenues, income from continuing operations, profitability, liquidity or capital resources, or that would cause reported financial information to be not necessarily indicative of future operating results or financial condition.

For our exploration activities, there is no production, sales or inventory in a conventional sense. Our financial success is dependent upon the extent to which we are capable of discovering mineralization and the economic viability of exploration properties. The construction and operation of such properties may take years to complete and the resulting income, if any, cannot be determined with certainty. Further, the sales value of mineralization discovered by us is largely dependent upon factors beyond our control, including the market value of the metals produced at any given time.

Many factors that are beyond the control of the Company can affect the Company's operations, including, but not limited to, the price of minerals, the economy on a global scale, land and exploration permitting, and the appeal of investments in mining companies. The appeal of mining companies as investment alternatives could affect the liquidity of the Company and thus future exploration and evaluation, extracting and processing activities, and financial conditions of the Company. Other factors such as retaining qualified mining personnel and contractor availability and costs could also impact the Company's operations.

E. Critical Accounting Estimates

Not applicable.

Item 6. Directors, Senior Management and Employees

A. Directors and Senior Management

The following table sets forth the names and positions of officers and directors:

Name	Age	Position	Position Held Since
Carlos J. Miguens	73	Director (Chair)	July 2019
Tim Hunt	69	Director	April 2010
Christopher van Tienhoven	54	Chief Executive Officer and Director	July 2019
Cristian Lopez Saubidet	47	Chief Financial Officer and Director	July 2019
Alexander Harper	74	Director	July 2019
David Jarvis	67	Director	July 2019
Leon Hardy	68	Director	February 2020
Jorge Sanguin	60	Chief Operating Officer	January 2020

All officers identified above serve at the discretion of the Board and have consented to act as officers of the Company.

Set forth below is a brief description of the background and business experience of the executive officers and directors:

Carlos J. Miguens, Director

Carlos J. Miguens currently serves as a Director and is the Chair of the Compensation Committee. Mr. Miguens has extensive business experience in Latin America. He was President of Cerveceria & Malteria Quilmes, one of Argentina's largest brewing companies, for 11 years, until its sale to Ambev.

In addition to his role with the Company, Mr. Miguens is President of Patagonia Gold S.A., Minera Minamalú S.A., Minera Aquiline Argentina SAU, Huemules S.A. and Leleque Exploración S.A. He is also Co-Founder and Vice-President of A.E.A. (Asociación Empresaria Argentina).

Tim Hunt, Director

Tim Hunt currently serves as a Director and is a member of the Audit Committee. Mr. Hunt has over 30 years of experience in the mining industry, including as an investment broker and as Founder of Hunt Mining Corp., which was engaged in the exploration and development of mineral properties in the Santa Cruz Province of Argentina for approximately 14 years. Prior to the RTO, Mr. Hunt served as Chairman and CEO of Hunt Mining Corp.

In addition to his role with the Company, Mr. Hunt is Founder and President of Huntwood Industries, one of the largest building products manufacturers in the Western United States. Mr. Hunt has led the development of Huntwood Industries for the past three decades, taking the business from a start-up venture to a significant middle-market enterprise.

Christopher van Tienhoven, Director and CEO

Christopher van Tienhoven currently serves as the Company's CEO and as a Director. During his 25 years' experience in the mining industry, Mr. van Tienhoven worked for the majority of his career with the Anglo American group in various countries and roles, culminating as Country Manager and President of Anglo Gold Ashanti's Cerro Vanguardia mine. In 2008, he joined Andean Resources Limited as Country Manager and Vice President for Argentina until 2010, when its main project, Cerro Negro, was sold to Goldcorp Inc. Before joining PGP as CEO in 2015, Mr. van Tienhoven had been dedicated to merger and acquisition opportunities in the junior mining sector in Latin America, including in Argentina, Colombia, Peru and Guatemala. Prior to the RTO, Mr. van Tienhoven served as a Director on the board of directors of Patagonia PLC on June 10, 2015.

Mr. van Tienhoven holds a Bachelor of Science in Economics from the Wharton School, University of Pennsylvania.

As CEO of the company, Christopher acts as the main point of communication between the Board of Directors and corporate operations. His main responsibilities include making major corporate decisions, managing the overall operations and resources of Patagonia Gold.

Cristian Lopez Saubidet, Director and CFO

Mr. Christian Lopez Saubidet currently serves as the Company's CFO and as a Director. Mr. Saubidet has 18 years of experience in finance and strategy. Since joining PGP in 2008 as a Director, he has served in a variety of roles, including as Vice President of Patagonia Gold S.A. and other subsidiaries of Patagonia PLC. Mr. Saubidet's previous roles include VP Strategy and Analytics for HSBC's Consumer Lending Division and as a Management Consultant for McKinsey & Co. in Buenos Aires, Pittsburgh and Chicago.

In addition to his roles with the Company, Mr. Saubidet currently also serves on the boards of directors of Central Puerto SA and San Miguel S.A., both listed companies on the Buenos Aires Stock Exchange.

Mr. Saubidet holds an MBA from the Anderson School at the University of California, Los Angeles and a Bachelor of science in Industrial Engineering from the Instituto Tecnológico de Buenos Aires.

Mr. Saubidet's responsibilities include financial planning and analyzing the company's financial strengths and proposing strategic direction. It is expected that Mr. Saubidet will dedicate approximately 50% of his time to his role as CFO and such services shall be provided as an independent contractor.

Alexander Harper, Director

Alexander Harper currently serves as a Director and is the Chair of the Audit Committee and member of the Compensation Committee. Mr. Harper began his career at Merrill Lynch in London in the 1970s as a registered representative. Subsequently, he became an independent international commodity trader, investor and consultant with extensive experience in the United Kingdom, Europe, the United States, Latin America and West Africa. Mr. Harper is currently based in Argentina.

Mr. Harper was educated at Winchester College, Hampshire, UK.

David Jarvis, Director

David Jarvis currently serves as a Director and is a member of the Audit Committee and the Compensation Committee. Mr. Jarvis is a mining executive with broad experience in the Americas and East and Central Asia. His previous roles include Superintendent, Mine Water Management for Newmont Gold, Mine Manager for Kumtor Operating Co., Centerra Gold, Kyrgyzstan, Production Manager, Nome Alaska for NovaGold Resources Inc. and Vice-President and General Manager for Coeur Mexicana, SA de C.V. S

In addition to his role with the Company, Mr. Jarvis serves as Principal at Jarvis Mineral Services, where he provides mining consulting services in Central Asia and North and South America.

Mr. Jarvis holds a Bachelor of Science degree in Mining Engineering from Pennsylvania State University.

Leon Hardy, Director

Leon Hardy currently serves as a Director. Mr. Hardy has over 40 years of relevant technical and operational experience, including with respect to operational, cost control, due diligence, strategic mine planning and feasibility study-related matters, and has 12 years of experience in Latin America. He previously served as the Company's Interim COO, Managing Director and COO of Hunt Mining Corp., President and CEO of Rockstar Resources, COO and Senior Vice-President for Coeur Mining Inc. and Vice President and General Manager of Coeur Argentina. Mr. Hardy also served as General Manager of the Company's Martha mine and was instrumental in the mine's success from the start-up stage through the construction of the 240 TPD Mill and subsequent full-scale operations.

Mr. Hardy holds a Bachelor of Science in Geological Engineering from the University of Arizona and is a registered professional engineer.

Jorge Sanguin, COO

Jorge Sanguin currently serves as the Company's COO. He is tasked with implementing the business operation of the company and reports to the CEO of Patagonia Gold. Mr. Sanguin is an Argentine national with over 26 years' experience in the mining sector. Mr. Sanguin has held key positions in a number of mining operations in Argentina, including Mining Manager at Manantial Espejo (Pan American Silver), President and General Manager and Board member of Cerro Vanguardia (AngloGold Ashanti) and General Manager of Cerro Moro (Yamana).

Mr. Sanguin holds a Bachelor of Science in Mining Engineering from the University of San Juan.

B. Compensation

SUMMARY COMPENSATION TABLE

The following table sets forth all annual and long-term compensation in US dollars for services in all capacities to the Company for the year ended December 31, 2021 in respect of the Company's named executive officers ("NEOs") expressed in US dollars:

Name and Principal Position	Salary (US\$)	Bonus (US\$)	Stock Awards (US\$)	Option Awards ⁽¹⁾ (US\$)	Non-Equity Incentive Plan Compensation (US\$)	Non-qualified Deferred Compensation Earnings (US\$)	All Other Compensation (US\$)	Total (US\$)
Jorge Sanguin, COO ⁽²⁾	260,000	-	-	38,000	-	-	-	298,000
Christopher van Tienhoven, CEO and Director ⁽³⁾	250,000	125,000	-	57,000	-	-	-	432,000
Cristian Lopez Saubidet, CFO and Director ⁽⁴⁾	-	-	-	38,000	-	-	12,000 ⁽⁵⁾	50,000

(1) On August 14, 2020, the Company granted stock options with an exercise price of CAD \$0.16 and an expiry date of August 14, 2025. The stock options vest in three equal tranches on the first, second and third anniversary of the grant date. The stock option compensation expense is recognized evenly during the vesting period. The fair value of the options was calculated on grant date using the Black-Scholes option pricing model and using the following assumptions:

Discount rate – 0.35%, Expected volatility – 172.95%, Expected life (years) – 5, Expected dividend yield – 0%, Forfeiture rate – 0%, Stock price – CAD\$0.15

Mr. Sanguin was granted 1,000,000 stock options in his capacity as the Chief Operating Officer.

Mr. van Tienhoven was granted 1,500,000 stock options in his capacity as the Chief Executive Officer.

Mr. Saubidet was granted 1,000,000 stock options in his capacity as the Chief Financial Officer.

On September 25, 2019, the Company granted stock options with an exercise price of CAD \$0.065 and maturity date of September 25, 2024. The stock options vest one year after the date of grant. The stock option compensation expense is recognized evenly during the vesting period. The fair value of the stock options was calculated on grant date using the Black-Scholes option pricing model using the following assumptions:

Discount rate – 1.46%, Expected volatility – 253.14%, Expected life (years) – 5, Expected dividend yield – 0%, Forfeiture rate – 0%, Stock price – CAD\$0.06

Mr. van Tienhoven was granted 1,000,000 stock options in his capacity as the Chief Executive Officer.

Mr. Saubidet was granted 500,000 stock options in his capacity as the Chief Financial Officer.

(2) Mr. Sanguin became the Chief Operating Officer effective January 1, 2020.

(3) Mr. van Tienhoven was appointed as Chief Executive Officer of the Company on July 22, 2019.

(4) Mr. Saubidet was appointed Chief Financial Officer and Director of the Company on July 22, 2019.

(5) Mr. Saubidet was paid \$12,000 in fees for serving in his capacity as a Director.

DIRECTOR'S COMPENSATION TABLE

The following table sets forth the total compensation earned by each director of the during the year ended December 31, 2021:

Director's Compensation Table Name	Fees Earned or		Option Awards ⁽¹⁾ (US\$)	Non-Equity Incentive Plan Compensation (US\$)	Non-qualified Deferred Compensation Earnings (US\$)	All Other Compensation (US\$)	Total (US\$)
	Paid in Cash (US\$)	Stock Awards (US\$)					
Carlos J. Miguens	12,000	-	19,000	-	-	-	31,000
Tim Hunt	12,000	-	19,000	-	-	-	31,000
Cristian Lopez Saubidet	12,000	-	-	-	-	-	12,000
Christopher van Tienhoven	-	-	-	-	-	-	-
Alexander Harper	12,000	-	19,000	-	-	-	31,000
David Jarvis	12,000	-	19,000	-	-	-	31,000
Leon Hardy	12,000	-	19,000	-	-	-	31,000

(1) On August 14, 2020, the Company granted stock options with an exercise price of CAD \$0.16 and an expiry date of August 14, 2025. The stock options vest in three equal tranches on the first, second and third anniversary of the grant date. The fair value of the options was calculated using the Black-Scholes option pricing model and using the following assumptions:

Discount rate – 0.35%, Expected volatility – 172.95%, Expected life (years) – 5, Expected dividend yield – 0%, Forfeiture rate – 0%, Stock price – CAD\$0.15

Mr. Miguens was granted 500,000 stock options in his capacity as a Director.
 Mr. Hunt was granted 500,000 stock options in his capacity as a Director.
 Mr. Harper was granted 500,000 stock options in his capacity as a Director.
 Mr. Jarvis was granted 500,000 stock options in his capacity as a Director.
 Mr. Hardy was granted 500,000 stock options in his capacity as a Director.

On September 25, 2019, the Company granted stock options with an exercise price of CAD \$0.065 and a maturity date of September 25, 2024. The stock options vest one year after the date of grant. The stock option compensation expense is recognized evenly during the vesting period. The fair value of the stock options was calculated on grant date using the Black-Scholes option pricing model using the following assumptions:

Discount rate – 1.46% Expected volatility – 253.14% Expected life (years) - 5 Expected dividend yield – 0% Forfeiture rate – 0% Stock price – CAD\$0.06

Mr. Miguens was granted 500,00 stock options in his capacity as a Director.
 Mr. Hunt was granted 500,000 stock options in his capacity as a Director.
 Mr. Saubidet was granted 500,000 stock options in his capacity as a Director.
 Mr. Harper was granted 500,000 stock options in his capacity as a Director.
 Mr. Jarvis was granted 500,000 stock options in his capacity as a Director.

INCENTIVE PLAN AWARDS

Outstanding Option-based Awards and Share-based Awards

The following table shows all option-based awards and share-based awards outstanding to be exercised in Canadian dollars to each NEO as of December 31, 2021:

Name	Option-based Awards				Share-based Awards			
	Number of securities underlying unexercised options (#) exercisable.	Number of securities underlying unexercised options (#) unexercisable. (1)	Equity incentive plan awards: Number of securities underlying unexercised options (#)	Option exercise price (CAD \$)	Option expiration date	Number of shares or units that have not vested (#)	Market value of shares or units of unearned stock that have not vested (\$)	Equity incentive plan awards: Market or value of payout shares or units of unearned rights that have not vested (\$)
Jorge Sanguin	1,133,333	666,667	-	0.065- 0.16	09/25/2024 - 08/13/2025	-	-	-
Christopher van Tienhoven	1,500,000	1,000,000	-	0.065- 0.16	09/25/2024 - 08/13/2025	-	-	-
Cristian Lopez Saubidet	1,333,333	666,667	-	0.065- 0.16	09/25/2024 - 08/13/2025	-	-	-
TOTAL	3,966,666	2,333,334	-	0.065- 0.16	09/25/2024 - 08/13/2025	-	-	-

(1) Options that expire August 13, 2025 vest in three (3) equal tranches on August 14, 2021, 2022 and 2023 (first, second and third anniversary of the grant date).

Incentive Plan Awards – Value Vested or Earned

The company has granted an aggregate of 5,000,000 incentive stock options under the Company’s stock option plan (the “Stock Option Plan”) to the directors of the Company and 12,250,000 incentive stock options to members of senior management and certain other officers of the Company as part of a long-term incentive plan (the “Option Grant”).

On September 26, 2019, the Company issued 7,650,000 stock options with an exercise price of CAD\$0.065 and maturity date of September 25, 2024. These stock options vested on first anniversary of the grant date.

On August 14, 2020 the Company issued 9,600,000 stock options with an exercise price of CAD\$0.16 and maturity date of August 13, 2025. These stock options vest evenly on each of the first, second and third anniversary of the grant date.

The Stock Option Plan allows for the issuance of up to 10% of the issued and outstanding share capital of the Company in the form of incentive stock options. As of the date hereof, a total of 466,566,441 common shares of the Company are issued and outstanding and the Option Grant represents approximately 3.70% of the issued and outstanding share capital.

C. Board practices

Each director of the Company is elected annually to serve until the next annual meeting of the shareholders unless that person ceases to be a director before then. Neither the Company nor any of its subsidiaries currently has in place service contracts with any of its directors providing benefits upon termination of employment.

The Company has a separately designated audit committee of the Board (the “Audit Committee”). The Audit Committee is responsible for: (1) selection and oversight of the independent accountant; (2) establishing procedures for the receipt, retention and treatment of complaints regarding accounting, internal controls and auditing matters; (3) establishing procedures for the confidential, anonymous submission by employees of concerns regarding accounting and auditing matters; (4) engaging outside advisors; and, (5) funding for the outside auditor and any outside advisors engagement by the audit committee. A copy of the Audit Committee charter is filed with this report as Exhibit 15.1. The Audit Committee consists of Mr. Tim Hunt, Mr. Dave Jarvis and Mr. Alexander Harper.

The Company also has a compensation committee that acts on behalf of the Board to approve compensation arrangements for management and review the compensation paid to the Board (the “Compensation Committee”). A copy of the Compensation Committee charter is filed with this report as Exhibit 15.2. The Compensation Committee is currently comprised of Carlos J. Miguens (not independent as the Board does not consider him to be free from any direct or indirect “material relationship” with the Company since he is a significant shareholder), David Jarvis (independent) and Alexander Harper (independent). The role of the Compensation Committee is, in part, to assist the Board in approving and monitoring the Company’s practices with respect to compensation. The Compensation Committee members have extensive experience in the mining sector. Compensation of Directors and the CEO. The chair of the Board, the Compensation Committee and the CEO have the responsibility for determining compensation for the CEO. To determine compensation payable to directors, the Chair of the Board, the Compensation Committee, the CEO and the CFO review compensation paid for directors of companies of similar size and stage of development in the mineral exploration industry and determine an appropriate compensation reflecting the need to provide incentive and compensation for the time and effort expended by the directors while taking into account the financial and other resources of the Company.

In setting the compensation of senior management, the Compensation Committee and the CEO review performance in light of the Company’s objectives and consider other factors that may have impacted the success of the Company in achieving its objectives.

The Board is confident that the collective experience of the Compensation Committee members ensures that the Compensation Committee has the knowledge and experience to execute its mandate effectively and to make executive compensation decisions in the best interests of the Company.

Compensation Risk

The Board considers that the Company's compensation philosophy is aligned with prudent risk management and does not encourage the NEOs to take inappropriate or excessive risks.

The Company does not prohibit NEOs or directors from purchasing financial instruments such as variable forward contracts or equity swaps, collars, or units of exchange funds, or other financial instruments designed to hedge or offset a decrease in market value of securities granted as compensation held, directly or indirectly, by an NEO or director. However, neither the Board nor executive management is aware that any such individual has in the past bought or currently holds such instruments.

During the year ended December 31, 2021, the Company had the following three (3) NEOs:

1. Christopher van Tienhoven, Chief Executive Officer
2. Cristian Lopez Saubidet, Chief Financial Officer
3. Jorge Sanguin, Chief Operating Officer

Elements of the Compensation Program

The three elements of the Company's compensation program during the financial year ended December 31, 2021 are (i) base salary and benefits, and (ii) an incentive stock option plan and (iii) incentive cash bonus. Each item of the compensation program is discussed below.

Base Salaries and Benefits

Salaries of executive officers are based on informal discussions and analysis by the Board. The Board has not used any formula in the determination of executive salaries. Base salaries are paid at levels that reward executive officers for ongoing performance and that enable the Company to attract and retain qualified executives with a demonstrated ability to maximize shareholder value. Base pay is a critical element of compensation program because it motivates the NEOs with stability and predictability, which allows the NEOs to focus their attention on maximizing shareholder value and other business initiatives. Although the Company has no specific formula for determining base salary, the Company may consider the following factors, among others: the executive's current base salary, qualifications and experience, industry knowledge, scope of responsibilities, past performance and length of service with the Company. The Company does not apply a specific weighting to any of the above factors. The Compensation Committee has not established formal periodic compensation review procedures; however, salaries and other elements of executive compensation will be reviewed periodically by the Compensation Committee and the Board.

The Company does not provide pension or retirement benefits to any of its executive officers.

Incentive Stock Option Plan

The Company has in place the Stock Option Plan which provides that the Board may from time to time, in its discretion, and in accordance with TSXV requirements, grant to directors, officers, employees and technical consultants to the Company, non-transferable options to purchase common shares, provided that the number of common shares reserved for issuance will not exceed 10% of the issued and outstanding common shares of the Company.

The number of stock options allocated to executive officers and directors will be determined by the Compensation Committee on a case by case basis. The Company has not adopted formal formula or formal procedures to determine stock option allocation to executives and directors. Previous grants of stock options

are taken into consideration when new option grants are contemplated. The grant of stock options is used to, among other things, attract, motivate, and retain qualified executive officers and directors by providing them with long-term incentives that will encourage them to add value to the Company. Stock options also serve to align executives' and directors' long-term interests with those of shareholders.

Incentive Cash Bonus

Incentive cash bonuses of executive officers are based on informal discussions and analysis by the Compensation Committee, which are then recommended to the Board for approval. The Board has not used any formula in the determination of Incentive cash bonuses. Bonuses are paid at levels that reward executive officers for ongoing performance and that enable the Company to retain qualified executives with a demonstrated ability to maximize shareholder value.

D. Employees

As at December 31, 2021, the Company had 154 full and part time employees and one individual working on a consulting basis.

E. Share Ownership

The following table sets forth certain information regarding the beneficial ownership of common stock as of April 29, 2022 by (i) each director, (ii) each officer named in the summary compensation table above, and (iii) all directors and executive officers as a group. Except as otherwise indicated below, each person named has sole voting and investment power with respect to the shares indicated. The percentage of ownership set forth below reflects each holder's ownership interest in the 466,566,441 shares of the common stock outstanding as of April 29, 2022.

Name and Address of Beneficial Owner	Shares	Percent	Vested Options	Warrants

- (9) 5,300,000 vested stock options with an exercise price of CAD\$0.065 and maturity date of September 25, 2024 and 2,000,001 vested stock options with an exercise price of CAD \$0.16 and an expiry date of August 14, 2025. And 57,777,777 warrants, each warrant entitles the holder thereof to purchase one common share at an exercise price of CAD \$0.13 until March 10, 2024.

Item 7. Major Shareholders and Related Party Transactions

A. Major Shareholders

The following table sets forth, as of April 25, 2022, the persons known to the Company to be the beneficial owner of more than five percent (5%) of our common shares. The percentage of ownership set forth below reflects each holder's ownership interest in the 466,566,441 shares of the common stock outstanding as of April 25, 2022.

The company's major shareholders do not have different voting rights.

Name of Beneficial Owner	Shares	Percent	Vested Options	Warrants
Carlos J. Miguens ⁽¹⁾	195,502,445	41.90%	666,667	57,777,777

B. Related Party Transactions

Except where otherwise noted, the amounts disclosed in this section are rounded to the nearest \$1,000 and are expressed in United States dollars.

Cantomi Uruguay S.A. ("Cantomi Uruguay") and Agropecuaria Cantomi S.A. ("Agropecuaria Cantomi")

Cantomi Uruguay and Agropecuaria Cantomi are owned and controlled by the Company's Director Carlos J. Miguens.

In February 2019, Cantomi Uruguay provided a two-year \$15 million loan facility that will be utilized to fund the Company’s activities going forward, while the review of the Cap-Oeste underground option is ongoing together with the pre-feasibility Study of its flagship Calcatreu Property. The loan facility has an interest rate of 5% and had an original maturity date of March 31, 2021. The loan facility was subsequently amended to extend the maturity date to December 31, 2023. All other terms of the loan remain unchanged.

During the year ended December 31, 2021, the Company incurred interest expense of \$699 on the loan facility. As of December 31, 2021, the Company owes \$15,507 (\$13,961 in principal and \$1,546 in interest) to Cantomi Uruguay under the loan facility. The largest principal balance outstanding during the year ended December 31, 2021 was \$13,961.

During the year ended December 31, 2021, the Company incurred \$63 in rent expense from Agropecuaria Cantomi relating to a subsidiary’s office. As of December 31, 2021, the Company owes \$166 in rent payable to Agropecuaria Cantomi. The largest outstanding balance during the year ended December 31, 2021 was \$166. As of the date of this filing, May 2, 2022, the amount outstanding is \$187 and no interest rate is applicable to this amount outstanding.

As of February 2021, Cantomi Uruguay S.A. is no longer a related party as Carlos Miguens no longer has control of the company.

C. Interest of Experts and Counsel

Not applicable.

Item 8. Financial Information

A. Consolidated Statements and Other Financial Information

Item 18 of this Annual Report contains the consolidated financial statements as at and for the years ended December 31, 2021, 2020 and 2019. The financial statements have been prepared in accordance with IFRS, as issued by the IASB.

Export Sales

(All dollar figures are in ‘000s of U.S. Dollars)

Export sales constituted 100% of the Company’s total sales volume during the fiscal years disclosed in the following table:

Year	Sales
2021	18,104
2020	19,849
2019	21,938

Legal Proceedings

Republic Metals Corporation (“Republic”) filed for protection under Chapter 11 of the United States Bankruptcy Code on November 2, 2018 (the “Petition Date”) in the United States Bankruptcy Court for the Southern District of New York. Republic processed material from the Company’s Lomada and Cap-Oeste properties in the Santa Cruz province of Argentina prior to the Petition Date. The Chapter 11 plan of liquidation in the bankruptcy proceedings appointed a Litigation Trustee (the “Trustee”) to handle the

Bankruptcy Estate of Republic. The Company received a demand letter (the “Demand Letter”) from the Trustee dated March 17, 2020, demanding repayment of amounts previously paid by Republic to the Company within 90 days before the Petition Date. The Company reviewed the Demand Letter with its independent US counsel and counsel has responded to the Demand Letter. Republic was required to have commenced an action to recover the Preference Amount by November 2, 2020. As of the date of this Annual Report, no litigation has been brought by Republic against the Company. No provision has been accrued in the consolidated financial statements related to the Demand Letter as Management does not anticipate that the Company will have to repay any of the amounts previously received from Republic.

With the exception of the foregoing, there are no legal proceedings to which our Company is a party and, to our knowledge, no such proceedings are pending.

Dividend Policy

The Company does not have a formal dividend policy and has not paid any dividends in the past and does not expect to pay any dividends in the foreseeable future. Any future payment of dividends will be determined by the Board on the basis of the Company’s earnings, financial requirements and other relevant factors.

B. Significant Changes

Not applicable.

Item 9. The Offer and Listing

A. Offer and Listing Details

The principal trading market for the Company’s shares is the TSX Venture Exchange and the ordinary shares are listed and posted for trading under the symbol PGDC.

B. Plan of Distribution

Not applicable.

C. Markets

The Company’s shares are currently listed on the TSXV under the symbol “PGDC” and the CUSIP number is 70289T. The Company’s shares are also listed on OTC Markets under the symbol “HGLD.”

D. Selling Shareholders

Not applicable.

E. Dilution

Not applicable.

F. Expenses of the Issue

Not applicable.

Item 10. Additional Information.

A. Share Capital

Not applicable.

B. Memorandum and Articles of Association

A copy of the Articles of the Company is filed with this report as Exhibit 1.1.

C. Material Contracts

Other than contracts entered into in the ordinary course of business, and except as described elsewhere in this Annual Report, the Company has not entered into any material contracts within the most recently completed financial year or previous to the most recently completed financial year, that are still in effect as of the date of this Annual Report.

D. Exchange Controls

Canada has no system of exchange controls. There are no Canadian restrictions on the repatriation of capital or earnings of a Canadian public company to non-resident investors. There are no laws in Canada or exchange restrictions affecting the remittance of dividends, profits, interest, royalties and other payments to non-resident holders of the Company's securities, except as discussed below under "Item 10. Additional Information, E. Taxation."

There are no limitations under the laws of Canada or in the organizing documents of the Company on the right of foreigners to hold or vote securities of the Company, except that the *Investment Canada Act* may require review and approval by the Minister of Industry (Canada) of certain acquisitions of "control" of the Company by a "non-Canadian". The threshold for acquisitions of control is generally defined as being one-third or more of the voting shares of the Company. "Non-Canadian" generally means an individual who is not a Canadian citizen, or a corporation, partnership, trust or joint venture that is ultimately controlled by non-Canadians.

E. Taxation

Certain Canadian Federal Income Tax Consequences

The following discussion describes the principal Canadian federal income tax consequences applicable to a holder of shares of our common stock which are traded on the TSXV, who, at all material times, is a resident of the United States for purposes of the Canada-United States Income Tax Convention (1980), as amended (the "Treaty") entitled to the full benefits of the Treaty and is not a resident, or deemed to be a resident, of Canada for purposes of the Income Tax Act (Canada) ("ITA"), deals at arm's length and is not affiliated with the Company, holds shares of our common stock as capital property and as beneficial owner, and does not use or hold, is not deemed to use or hold, his or her common stock of the Company in connection with carrying on a business in Canada and, did not, does not and will not have a fixed base or permanent establishment in Canada within the meaning of the Treaty (a "non-resident holder").

This summary does not apply to a holder (i) that acquires share of our common stock by virtue of employment; (ii) that is a financial institution, specified financial institution, registered non-resident insurer, authorized foreign bank, partnership or a trust as defined in the ITA; or (iii) that is a "foreign affiliate" (as defined in the ITA) of a taxpayer resident in Canada.

This summary is based upon the current provisions of the ITA in force as of the date hereof, managements' understanding of the current administrative policies and assessing practices of the Canada Revenue Agency (the "CRA") published by it in writing prior to the date hereof. This summary takes into account all specific proposals to amend the ITA publicly announced by or on behalf of the Minister of Finance (Canada) prior to the date hereof (the "Tax Proposals") and assumes that the Tax Proposals will be enacted substantially as proposed; however, no assurance can be given that the Tax Proposals will be enacted as proposed or at all. This summary does not otherwise take into account or anticipate any changes in law or the CRA's administrative policies or assessing practices, whether by legislative, governmental, administrative or judicial decision or action, nor does it take into account any provincial, territorial or foreign income tax legislation or considerations, which considerations may differ significantly from the Canadian federal income tax considerations discussed in this summary.

The following discussion is for general information only and is not intended to be, nor should it be construed to be, legal or tax advice to any holder of the Company, and no opinion or representation with respect to the Canadian federal income tax considerations to any such holder or prospective holder is made. Accordingly, holders and prospective holders of the Company are urged to consult with their own tax advisors about the federal, provincial and foreign tax consequences of purchasing, owning and disposing of the common stock of the Company.

Dividends

Dividends paid or credited or deemed under the ITA to be paid or credited by the Company to a non-resident holder will be subject to a 25% Canadian withholding tax under the ITA, subject to a reduction in the rate of withholding under the Treaty. The Treaty provides that the statutory 25% withholding tax rate is generally reduced to 15% on the gross amount of the dividends paid on shares of a corporation resident in Canada (such as the Company) to beneficial owners of the dividend who is a non-resident holder (or 5% for a company that holds at least 10% of the voting stock of the corporation paying the dividend). Non-resident holders should consult their own tax advisors.

Capital Gains

A non-resident of Canada will not be subject to tax under the ITA in respect of a capital gain realized upon the disposition or a deemed disposition of a share of a corporation unless, nor will capital losses arising therefrom be recognized under the ITA, at the time of the disposition or deemed disposition, the shares are considered to be "taxable Canadian property" within the meaning of the ITA and the holder is not otherwise entitled to an exemption under the applicable tax treaty.

Provided that the common stock of the Company are then listed on a "designated stock exchange" for purposes of the ITA (which currently includes the TSXV), at the time of disposition, our common stock generally will not constitute taxable Canadian property of a non-resident holder at that time, unless at any time during the 60 month period immediately preceding the disposition of the common stock (i) 25% or more of the issued shares of any class or series of the capital stock of the Company were owned by, or belonged to, any combination of (a) the non-resident holder, (b) persons with whom the non-resident holder did not deal at arm's length, and (c) partnerships in which the non-resident holder or a person described in (b) held a membership interest directly or indirectly through one or more partnerships; and (ii) at such time, more than 50% of the fair market value of such shares was derived, directly or indirectly, from any combination of real or immovable property situated in Canada, "Canadian resource property" (as defined in the ITA), "timber resource property" (as defined in the ITA), or options in respect of, interests in, or for civil law rights in such properties, whether or not such property exists. Notwithstanding the foregoing, our

common stock may also be deemed to be taxable Canadian property to a non-resident holder for purposes of the ITA in certain circumstances.

In the case of a non-resident holder to whom shares of our common stock constitute taxable Canadian property, no Canadian taxes will be payable on a capital gain realized on such shares unless the value of such shares is derived principally from real property situated in Canada within the meaning of the Treaty at the time of the disposition. For this purpose, "real property" has the meaning that term has under the laws of Canada and includes any option or similar right in respect thereof and usufruct of real property, rights to explore for or to exploit mineral deposits, sources and other natural resources and rights to amounts computed by reference to the amount or value of production from such resources.

Certain United States Federal Income Tax Consequences

The following is a general discussion of certain possible United States Federal income tax consequences, under current law, generally applicable to a U.S. Holder (as defined below) of shares our common stock. This discussion does not address all potentially relevant Federal income tax matters and does not address consequences peculiar to persons subject to special provisions of Federal income tax law, such as those described below as excluded from the definition of a U.S. Holder. In addition, this discussion does not cover any state, local or foreign tax consequences, except as otherwise specifically noted (See "Certain Canadian Federal Income Tax Consequences" above).

The following discussion is based upon the sections of the Internal Revenue Code of 1986, as amended (the "Code"), Treasury Regulations, published Internal Revenue Service ("IRS") rulings, published administrative positions of the IRS and court decisions that are currently in effect and as applicable herein, any or all of which could be materially and adversely changed, possibly on a retroactive basis, at any time. In addition, this discussion does not consider the potential effects, both adverse and beneficial, of recently proposed legislation which, if enacted, could be applied, possibly on a retroactive basis, at any time. The following discussion is for general information only and it is not intended to be, nor should it be construed to be, legal or tax advice to any holder or prospective holder of shares of our common stock, and no opinion or representation with respect to the U.S. Federal income tax consequences to any such holder or prospective holder is made. Accordingly, holders and prospective holders of shares of our common stock are urged to consult their own tax advisors about the U.S. Federal, state, local, and foreign tax consequences of purchasing, owning and disposing of shares of our common stock.

U.S. Holders

As used herein, a "U.S. Holder" means a holder of shares of our common stock who is a citizen or an individual who is treated as a resident of the United States (as determined under the United States tax laws for U.S. federal income tax purposes); a corporation (or other entity taxed as a corporation for U.S. federal income tax purposes) created or organized in or under the laws of the United States, any State or political subdivision thereof or the District of Columbia; an estate the income of which is taxable in the United States irrespective of source; or a trust if (a) a court within the United States is able to exercise primary supervision over the trust's administration and one or more United States persons have the authority to control all of its substantial decisions or (b) the trust was in existence on August 20, 1996 and has properly elected to continue to be treated as a United States person. This summary does not address the United States tax consequences to, and U.S. Holder does not include, persons subject to specific provisions of U.S. federal income tax law, including but not limited to tax-exempt organizations, qualified retirement plans, individual retirement accounts and other tax-deferred accounts, financial institutions, insurance companies, real estate investment trusts, regulated investment companies, broker-dealers, non-resident alien individuals, persons or entities that have a "functional currency" other than the U.S. dollar, persons who hold shares of our common stock as part of a straddle, hedging or a conversion transaction, and persons who acquire their

shares of our common stock as compensation for services. This discussion is limited to U.S. Holders who own shares of our common stock as capital assets and who hold the shares of our common stock directly (e.g., not through an intermediary entity such as a corporation, partnership, limited liability company, or trust). This discussion does not address the consequences to a person or entity of the ownership, exercise or disposition of any options, warrants or other rights to acquire shares of our common stock.

Distributions

Subject to the discussion below regarding passive foreign investment companies (“PFICs”), the gross amount of any distribution (including non-cash property) by us (including any Canadian taxes withheld therefrom) with respect to shares of our common stock generally should be included in the gross income of a U.S. Holder as foreign source dividend income to the extent such distribution is paid out of current or accumulated earnings and profits of ours, as determined under United States Federal income tax principles. Distributions received by non-corporate U.S. Holders may be subject to United States Federal income tax at lower rates than other types of ordinary income (at graduated rates of 0%, 15%, or 20%) in taxable years beginning on or before December 31, 2010 if certain conditions are met. These conditions include the Company not being classified as a PFIC, it being a “qualified foreign corporation,” the U.S. Holder’s satisfaction of a holding period requirement, and the U.S. Holder not treating the distribution as “investment income” for purposes of the investment interest deduction rules. A qualified foreign corporation generally includes a foreign corporation (other than a PFIC) if (i) its shares are readily tradable on an established securities market in the United States or (ii) it is eligible for benefits under an applicable comprehensive U.S. income tax treaty that includes an exchange of information program and which the U.S. Treasury Department has determined is satisfactory for these purposes. U.S. Holders should consult their own tax advisors regarding the availability of the reduced tax rate on dividends in light of their particular circumstances. To the extent that the amount of any distribution exceeds our current and accumulated earnings and profits for a taxable year, the distribution first will be treated as a tax-free return of capital to the extent of the U.S. Holder’s adjusted tax basis in shares of our common stock and to the extent that such distribution exceeds the Holder’s adjusted tax basis in shares of our common stock, will be taxed as capital gain. In the case of U.S. Holders that are corporations, such dividends generally will not be eligible for the dividends received deduction.

Section 1411 of the Internal Revenue Code imposes a 3.8% Medicare surtax on net investment income of certain individuals, estates and trusts. In general, distributions by the Company will be considered investment income for purposes of the surtax.

If a U.S. Holder receives a dividend in Canadian dollars, the amount of the dividend for U.S. federal income tax purposes will be the U.S. dollar value of the dividend (determined at the spot rate on the date of such payment) regardless of whether the payment is later converted into U.S. dollars. In such case, the U.S. Holder may recognize additional ordinary income or loss as a result of currency fluctuations between the date on which the dividend is paid and the date the dividend amount is converted into U.S. dollars.

Disposition of Shares of our Common Stock

Subject to the discussion below regarding PFIC’s, gain or loss, if any, realized by a U.S. Holder on the sale or other disposition of shares of our common stock (including, without limitation, a complete redemption of shares of our common stock) generally will be subject to U.S. Federal income taxation as capital gain or loss in an amount equal to the difference between the U.S. Holder’s adjusted tax basis in shares of our common stock and the amount realized on the disposition. Net capital gain (i.e., capital gain in excess of capital loss) recognized by a non-corporate U.S. Holder (including an individual) upon a sale or other disposition of shares of our common stock that have been held for more than one year will generally be

subject to a U.S. federal income tax at graduated rates of 0%, 15%, or 20% subject to the PFIC rules below. Deductions for capital losses are subject to certain limitations.

Section 1411 of the Internal Revenue Code imposes a 3.8% Medicare surtax on net investment income of certain individuals, estates and trusts. In general, capital gain or loss recognized upon the sale of Common Stock of the Company will be considered investment income for purposes of the surtax.

If the U.S. Holder receives Canadian dollars on the sale or disposition, it will have a tax basis in such dollars equal to the U.S. dollar value. Generally, any gain or loss realized on a subsequent disposition of the Canadian dollars will be U.S. source ordinary income or loss.

U.S. “Anti-Deferral” Rules

Passive Foreign Investment Company (“PFIC”) Regime

If we, or a non-U.S. entity directly or indirectly owned by us (“Related Entity”), has 75% or more of its gross income as “passive” income, or if the average value during a taxable year of ours or the Related Entity’s “passive assets” (generally, assets that generate passive income) is 50% or more of the average value of all assets held by us or the Related Entity, then we may be treated as a PFIC and the corresponding United States PFIC rules may apply to U.S. Holders. Additionally, if we are classified as a PFIC in any taxable year with respect to which a U.S. Holder owns shares, we generally will continue to be treated as a PFIC with respect to such U.S. Holder in all succeeding taxable years, regardless of whether we continue to meet the tests described above, unless the U.S. Holder makes the “deemed sale election” described below.

If we or a Related Entity is classified as a PFIC, a U.S. Holder will be subject to increased tax liability in respect of gain recognized on the sale of his, her or its shares of our common stock or upon the receipt of certain distributions, unless such person makes a “qualified electing fund” election to be taxed currently on its pro rata portion of our income and gain, whether or not such income or gain is distributed in the form of dividends or otherwise, and we choose to provide certain annual statements which include the information necessary to determine inclusions and assure compliance with the PFIC rules. As another alternative to the foregoing rules, a U.S. Holder may make a mark-to-market election to include in income each year as ordinary income an amount equal to the increase in value of its shares of our common stock for that year or to claim a deduction for any decrease in value (but only to the extent of previous mark-to-market gains).

If we are classified as a PFIC and then cease to be so classified, a U.S. Holder may make an election (a “deemed sale election”) to be treated for U.S. federal income tax purposes as having sold such U.S. Holder’s subordinate voting shares on the last day of our taxable year during which we were a PFIC. A U.S. Holder that makes a deemed sale election would then cease to be treated as owning stock in a PFIC by reason of ownership of our subordinate voting shares. However, gain recognized as a result of making the deemed sale election would be subject to the adverse rules described above and loss would not be recognized.

We or a related entity express no opinion as to the Company’s or a related entity’s status as a PFIC for the current or any future or prior year. U.S. Holders should consult their own tax advisors with respect to the PFIC issue and its applicability to their particular tax situation.

Controlled Foreign Corporation Regime (“CFC”)

If a U.S. Holder (or person defined as a U.S. person under Section 7701(a)(30) of the Code) owns, directly, indirectly, or constructively, 10% or more of the total combined voting power of all classes of our stock or the value of our stock (a “U. S. Shareholder”) and U.S. Shareholders own more than 50% of the vote or

value of our Company, directly, indirectly, or constructively, we would be a “controlled foreign corporation. This classification would effect many complex results, one of which requires such 10% U.S. Holders to include in their current income their pro rata share of (i) Subpart F income of the CFC, (ii) the CFC’s earnings from certain investments in U.S. property, (iii) global intangible low-taxed income (“GILTI), and (iv) base erosion minimum tax amounts for certain 10% U.S. Holders with sufficient gross receipts that make deductible payments to related foreign parties in tax years after December 31, 2018.

In addition, under Section 1248 of the Code, gain from the sale or exchange of shares of our common stock by a US person who is or was a U. S. Shareholder at any time during the five year period before the sale or exchange may be treated as ordinary income to the extent of earnings and profits of ours attributable to the stock sold or exchanged. We or a related entity express no opinion as to the Company’s or a related entity’s status as a CFC under the Code. U.S. Holders should consult their own tax advisors with respect to the CFC classification and related tax matters and their applicability to their particular tax situation.

If a foreign corporation is both a PFIC and a CFC, the foreign corporation generally will not be treated as a PFIC with respect to certain 10% U.S. Holders of the CFC. This rule generally will be effective for taxable years of 10% U.S. Holders beginning after 1997 and for taxable years of foreign company’s ending with or within such taxable years of 10% U.S. Holders. The PFIC provisions continue to apply in the case of a PFIC that is also a CFC with respect to the U.S. Holders that are less than 10% shareholders. Because of the complexity of Subpart F, a more detailed review of these rules is beyond the scope of this discussion.

Foreign Tax Credit

A U.S. Holder who pays (or has withheld from distributions) Canadian income tax with respect to us may be entitled to either a deduction or a tax credit for such foreign tax paid or withheld, at the option of the U.S. Holder. Generally, it will be more advantageous to claim a foreign tax credit because a credit reduces United States federal income tax on a dollar-for-dollar basis, while a deduction merely reduces the taxpayer’s income subject to tax. This election is made on a year-by-year basis and generally applies to all foreign taxes paid by (or withheld from) the U.S. Holder during that year.

There are significant and complex limitations which apply to the foreign tax credit, among which is the general limitation that the credit cannot exceed the proportionate share of the U.S. Holder’s United States income tax liability that the U.S. Holder’s foreign source income bears to its worldwide taxable income. This limitation is designed to prevent foreign tax credits from offsetting United States source income. In determining this limitation, the various items of income and deduction must be classified into foreign and domestic sources. Complex rules govern this determination.

In addition, this limitation is calculated separately with respect to specific “baskets” of income consisting of passive income, general income, foreign branch income, and section 951A income. Foreign taxes assigned to a particular class of income generally cannot offset United States tax on income assigned to another class. Unused foreign tax credits can generally be carried back one year and carried forward ten years.

The availability of the foreign tax credit and the application of the limitations on the credit are fact specific, and U.S. Holders should consult their own tax advisors regarding their individual circumstances.

Backup Withholding

Payment of dividends and sales proceeds that are made within the United States or through certain U.S.-related financial intermediaries generally are subject to information reporting requirement and to backup withholding unless the U.S. Holder (i) is a corporation or other exempt recipient or (ii) in the case of backup

withholding, provides a correct taxpayer identification number and certifies that no loss of exemption from backup withholding has occurred.

The amount of any backup withholding from a payment to a U.S. Holder will be allowed as a credit against the U.S. Federal income tax liability of the U.S. Holder and may entitle the U.S. Holder to a refund, provided that the required information is timely furnished to the IRS.

F. Dividends and Paying Agents

G. Statement by Experts

Not applicable.

H. Documents on Display

We are subject to the informational requirements of the Exchange Act. In accordance with these requirements, we file reports and other information as a foreign private issuer with the SEC. You may inspect and copy our public filings without charge at the public reference facilities maintained by the SEC at 100 F Street, N.E., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information about the public reference room. The SEC maintains a website (www.sec.gov) that contains reports, proxy and information statements and other information regarding registrants that file electronically with the SEC.

You may also inspect reports and other information about the Company electronically on its website at www.patagoniagold.com or at the Company's head office at Av. Del Libertador 498, Piso 26, C1001ABR, Buenos Aires, Argentina, during normal business hours.

I. Subsidiary Information

Not applicable.

Item 11. Quantitative and Qualitative Disclosures About Market Risk

The amounts disclosed in this item are presented in thousands of US Dollars.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The company is exposed to interest rate risk with regards to its bank indebtedness which is comprised of lines of credits at variable interest rates. To the extent that changes in the prevailing market interest rates differ from the interest rates on the Company's monetary liabilities, the Company is exposed to interest rate price risk.

Currency Risk

Currency risk is the risk to the Company's earnings that arises from fluctuations of foreign exchange rates and the degree of volatility of these rates. The Company does not use derivative instruments to reduce its exposure to foreign currency risk.

As at December 31, 2021, the Company had financial assets and liabilities denominated in the following foreign currencies:

	CAD	AR\$	USD	Euro	GBP
Cash	\$ 107	\$ 130	54	\$ -	\$ -
Other working capital (deficit) items - net	(140)	(5,218)	(8,080)	(207)	19
Non-current financial assets	-	401	2,323		15
Non-current financial liabilities	-	-	(15,762)		-

Credit Risk

Credit risk arises from the potential that counterparties will fail to satisfy their obligations as they come due. Credit risk is managed by dealing with parties that the Company believes to be creditworthy and by actively monitoring credit exposure and the financial health of the parties. The majority of accounts receivable relate to the sale of gold and silver.

The Company currently maintains a substantial portion of its day-to-day operating cash balances at financial institutions. As at December 31, 2021, the Company had total cash balances of \$291 (2020 - \$819) at financial institutions, where \$Nil (2020 - \$Nil) is in excess of federally insured limits.

The Company has concentrations of credit risk with respect to its trade receivables, the majority of which are concentrated internationally amongst a small number of customers. As at December 31, 2021 and 2020, the Company had two (2) customers that make up the entire balance of the trade receivables. The Company controls credit risk through monitoring procedures, and by performing credit evaluations of its customers, but generally does not require collateral to secure accounts receivable.

Liquidity Risk

Liquidity risk refers to the risk that the Company will not be able to meet its financial obligations when they become due. The Company's management is responsible for reviewing liquidity resources to ensure funds are readily available to meet its financial obligations as they come due, as well as ensuring adequate funds exist to support business strategies and operations growth. As at December 31, 2021, the Company had current assets of \$6,562 (2019 - \$6,419) to settle current liabilities of \$14,290 (2020 - \$14,527).

Commodity Risk

Mineral prices and marketability fluctuate and any decline in mineral prices may have a negative effect on the Company. Mineral prices, particularly gold and silver prices, have fluctuated widely in recent years. The marketability and price of minerals which may be produced and sold by the Company will be affected by numerous factors beyond the control of the Company. These other factors include delivery uncertainties related to the proximity of its resources to processing facilities and extensive government regulations related to price, taxes, royalties, allowable production land tenure, the import and export of minerals and many other aspects of the mining business.

Item 12. Description of Securities Other than Equity Securities

Not applicable.

Item 13. Defaults, Dividend Arrearages and Delinquencies

Not applicable.

Item 14. Material Modifications to the Rights of Security Holders and Use of Proceeds

Not applicable.

Item 15. Controls and Procedures

Disclosure Controls and Procedures

As required by paragraph (b) of Rules 13a-15 or 15d-15 under the Exchange Act, our principal executive officer and principal financial officer evaluated our Company's disclosure controls and procedures (as defined in rules 13a-15(e) and 15d-15(e) of the Exchange Act) as of the end of the period covered by this Annual Report on Form 20-F. Based on the evaluation, these officers concluded that as of the end of the period covered by this Annual Report on Form 20-F, our disclosure controls and procedures were effective to ensure that the information required to be disclosed by our Company in reports it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time period specified in the rules and forms of the Securities and Exchange Commission. These disclosure controls and procedures include controls and procedures designed to ensure that such information is accumulated and communicated to our Company's management, including our Company's principal executive officer and principal financial officer, to allow timely decisions regarding required disclosure.

Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues, if any, within our company have been detected.

Management's Annual Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) for our Company. Our Company's internal control over financial reporting is designed to provide reasonable assurance, not absolute assurance, regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with International Financial Reporting Standards. Internal control over financial reporting includes those policies and procedures that: (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our Company's assets; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with International Financial Reporting Standards, and that our Company's receipts and expenditures are being made only in accordance with authorizations of our management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of assets that could have a material effect on our financial statements.

For the purposes of Exchange Act Rules 13a-15(e), 13a-15(f), 15d-15(e), and 15d-15(f), management, including our principal executive officer and principal financial officer, conducted an evaluation of the design and operation of our internal controls over financial reporting as of December 31, 2021, based on the criteria set forth in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO 2013). This evaluation included review of the documentation of controls, evaluation of the design effectiveness of controls, testing of the operating effectiveness of controls and a conclusion on this evaluation. Based on this evaluation, our management concluded our internal controls over financial reporting were effective as at December 31, 2021.

This Annual Report does not include an attestation report of the Company's independent registered public accounting firm regarding internal control over financial reporting because we are a non-accelerated filer.

Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues, if any, within our company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake.

Changes in Internal Control over Financial Reporting

Based on the evaluation as at December 31, 2021, management, including our principal executive officer and principal financial officer, have concluded that there were no material changes in the design of internal controls from the last annual reporting date of December 31, 2021.

Item 16. [Reserved]

Item 16A. Audit Committee Financial Expert

The Company's Board has determined that there are no financial experts serving on the Audit Committee. The Company believes the cost related to retaining a financial expert at this time is prohibitive.

Item 16B. Code of Ethics

All the Company's directors, officers and employees are required to comply with the Company's Code of Business Conduct and Ethics (the "Code"). The purpose of these corporate policies is to ensure to the greatest possible extent that business is conducted in a consistently legal and ethical manner.

The Code is designed to promote the following objectives:

- Honest and ethical conduct, including ethical interactions with government officials and the ethical handling of actual or apparent conflicts of interest between personal and professional relationships;
- Full, fair, accurate, timely, understandable and transparent disclosure in periodic reports and documents required to be filed by the Company and in other public communications made by the Company;
- Compliance with the applicable exchange, government and self-regulatory organization laws, rules and regulations;
- Prompt internal reporting of Code violations; and
- Accountability for compliance with the Code.

The text of the Code is available on the Company's website (www.patagoniagold.com/company/policies/). The Company intends to disclose on its website any amendment to, or waiver from, a provision of policies as required by law.

There were no material changes to the procedures by which security holders may recommend nominees to the Company's board of directors.

No amendments have ever been made to the Company's Code and no waiver, including an implicit waiver, has ever been granted to one of the officers or persons to whom the code applies. If in the future, an amendment is made to the code or a waiver is provided, the Company will disclose the required information on its Internet website within five business days following the date of the amendment or waiver. This information will remain available on the website for 12-months, following which the Company will retain

the information for a period of five years. If requested to do so by the Commission, the Company will furnish to the Commission or its staff a copy of any or all information retained pursuant to this requirement.

Item 16C. Principal Accountant Fees and Services.

Audit Fees

The following table sets forth the aggregate fees billed to the Company by Grant Thornton LLP and its associates during the year ended December 31, 2021 and 2020.

	Year ended December 31,	
	2021	2020
Audit fees	238,000	180,000
Audit-related fees ⁽¹⁾	42,000	37,000
Tax fees ⁽²⁾	31,000	14,000
Total	311,000	231,000

Notes:

(1) Fees for the quarterly review of the financial statements

(2) Fees for the preparation of the Company's tax returns.

Before the accountant is engaged by the Company, to render audit or non-audit services, the engagement is approved by the Company's audit committee.

Item 16D. Exemptions from the Listing Standards for Audit Committees

Not applicable.

Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers

ISSUER PURCHASES OF EQUITY SECURITIES				
Period (Year ended December 31, 2021)	(a) Total Number of Shares purchased	(b) Average Price Paid per Share (\$ USD)	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
January 1 - 31	-	-	-	-
February 1 - 28	-	-	-	-
March 1 - 31	-	-	-	-
April 1 - 30	-	-	-	-
May 1 - 31	-	-	-	-
June 1 - 30	-	-	-	-
July 1 - 31	-	-	-	-
August 1 - 31	-	-	-	-
September 1 - 30	-	-	-	-
October 1 - 31	-	-	-	-
November 1 - 30	-	-	550,000	9,450,000
December 1 - 31	-	-	-	-
Total	-	-	550,000	9,450,000

On February 19, 2020, the Company announced that it has received approval from the TSXV of its Notice of Intention to Make a Normal Course Issuer Bid (the "NCIB"). Under the NCIB, the Company may purchase for cancellation up to 15,897,199 common shares (the "Shares") (representing approximately 5%

of its 317,943,990 issued and outstanding common shares as of February 17, 2020) over a twelve (12) month period commencing on February 21, 2020. The NCIB expired on February 20, 2021.

On October 26, 2021, the Company announced that it has received approval from the TSXV of its Notice of Intention to Make a NCIB. Under the NCIB, the Company may purchase for cancellation up to 10,000,000 common shares (the “Shares”) (representing approximately 2% of its 467,116,441 issued and outstanding common shares as of October 26, 2021 over a twelve (12) month period commencing on October 26, 2021.

During the year ended December 31, 2021, the Company repurchased 550,000 common shares under the NCIB for \$19,891.

Item 16F. Change in Registrant’s Certifying Accountant

Not applicable.

Item 16G. Corporate Governance

Not applicable.

Item 16H. Mine Safety Disclosure

Not applicable.

Item 16I. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

CERTIFICATIONS

I, Christopher van Tienhoven, certify that:

1. I have reviewed this Amendment No. 1 to the annual report on Form 20-F of Patagonia Gold Corp.
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the company as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the company and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under my supervision, to ensure that material information relating to the company, including its consolidated subsidiaries, is made known to me by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under my supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the company's disclosure controls and procedures and presented in this report my conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the company's internal control over financial reporting that occurred during the period covered by the annual report that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on my most recent evaluation of internal control over financial reporting, to the company's auditors and the audit committee of the company's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weakness in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the company's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the company's internal control over financial reporting.
